

**TOTALLY INTEGRATED POWER**

# What's new

## SIMARIS busbarplan 2.2

### System compatibility

- SIMARIS busbarplan 2.2 allows to load projects of version 1.x
- SIMARIS busbarplan 2.2 is compatible with Autodesk REVIT versions 2019, 2020, 2021 and 2022

### New products and systems

- LData busbar trunking system
- BD01 busbar trunking system

### New functions

- Work sharing capability BIM360 (working in parallel at the same model, but only one user at the same time with SIMARIS busbarplan)
- Connection points for busbar trunking systems in IFC models of the SIVACON S8 low-voltage switchboard exported from SIMARIS project
- Collision check for busbar trunking unit / clearance zone

### Correction of minor errors

### Interfaces / Output

- SIMARIS busbarplan 2.2 projects can be exported by way of a parts list function via a transfer file and be imported into SIMARIS project 7.0
