#### Права поставщика Обоснование, масштаб и основной подход

Требования информационной безопасности для защиты от атак кибербезопасности со стороны внешних пользователей вызывают необходимость механизма защищенного входа в систему.

«Права поставщика» — это система доступа, позволяющая пользователям поставщиков получать доступ к приложениям Siemens посредством уникальной двухфакторной аутентификации: Фактор 1. Адрес электронной почты, подтверждающий право доступа, и пароль. Фактор 2: дополнительный фактор, предоставляемый соответствующему пользователю.

В зависимости от выбранного второго метода аутентификации пользователи поставщика получают

Вариант 1: push-уведомление на мобильный телефон (приложение Guardian)

Вариант 2: одноразовый пароль (ОТР) в текстовом сообщении (SMS) на мобильный телефон.

Вариант 3: код, сгенерированный через приложение для аутентификации после сканирования QR-кода.

SIEMENS

При успешном подтверждении доступ к приложению предоставляется.
