

## Siemens combines Annual and Sustainability Reports

For the first time, Siemens' Annual Report 2013 is a combination of the company's previously separate Annual and Sustainability Reports. This report now shows Siemens' full spectrum of topics – from the company's strategic direction and business development in the Sectors to the most important sustainability aspects such as research and development, energy-efficient technologies, environmental protection and suppliers.

The proportion of Siemens' revenue generated by green technologies increased again slightly in 2013. While in continuing operations €32.3 billion came from ecofriendly products and solutions, a slight reduction by comparison with the prior year figure of €32.7 billion, revenue from the Environmental Portfolio increased from 42 to 43 percent of total sales.

**Siemens AG** (Berlin and Munich) is a global powerhouse in electronics and electrical engineering, operating in the fields of industry, energy and healthcare as well as providing infrastructure solutions, primarily for cities and metropolitan areas. For over 165 years, Siemens has stood for technological excellence, innovation, quality, reliability and internationality. The company is one of the world's largest providers of environmental technologies. Around 43 percent of its total revenue stems from green products and solutions. In fiscal 2013, which ended on September 30, 2013, revenue from continuing operations totaled €75.9 billion and income from continuing operations €4.2 billion. At the end of September 2013, Siemens had around 362,000 employees worldwide on the basis of continuing operations.
