SIEMENS MOBILITY

Amtrak Airo

usa.siemens.com/mobility

A Next Generation Investment

- In July of 2021, Siemens Mobility was awarded contracts to design, manufacture, and technically support 73 Amtrak Airo trainsets.
- In August of 2023, 10 additional trainsets were ordered bringing the total order number to 83 trainsets.
- The first trainset was delivered in 2025 with operation scheduled to start on Amtrak's Cascades route in 2026.
- The new trains will operate on routes throughout the country.
- The procurement of these trainsets is supported by funding from the Infrastructure Investment and Jobs Act (IIJA).

A Robust Supply Chain

- Siemens Mobility is proud to build Buy America-compliant vehicles
- 100 U.S. suppliers in 31 states providing 3,829 individual project parts
- 16 California suppliers providing 2,141 of those individual project parts

An American Workforce

- These trainsets began production at Siemens Mobility's 60-acre solar-powered North American rail headquarters in Sacramento, California.
- In 2026, Siemens Mobility opened a new $220M, 200-acre manufacturing facility in Lexington, North Carolina, which has begun production on passenger coaches for the Airo fleet.
- Siemens Mobility has nearly 4,500 employees across North America.
- With full manufacturing capabilities including design, engineering, testing, carshell, bogies, subassembly, and final assembly, the facility has manufactured more than 3,000 vehicles for 35 transit agencies in the U.S. and Canada.

Elevated Experience

- Modern, spacious interior and panoramic windows.
- Full ADA accessibility with 360° turning circles.
- Speeds of up to 125 mph on sections of some East Coast routes.
