

# Shared Autonomous Mobility – Transforming Autonomous Driving

Thomas Walbrun, Head of Sales and Projects Shared Autonomous Mobility  
October 20, 2019 | Siemens Mobility ITS World Congress Press Event

# Siemens Mobility Intelligent Traffic Systems (ITS) – Investing into data-driven services

## ITS Core

Urban, Interurban, Tolling, (Digital) Service

### Mobility Operating System

### Shared Autonomous Mobility

Advanced Traffic Management System, V2X, simulation and prediction

Make public transport operators Uber-ready and provide end2end software platform

### We play in an eco-system

Developing the new ventures in cooperation with our partners

# Shared Autonomous Mobility – Autonomous shuttle system allows for profitable public transport operations

## Solution

### Autonomous shuttle system for public transport

On-demand or fixed scheduled first/last mile services

### Intelligent infrastructure

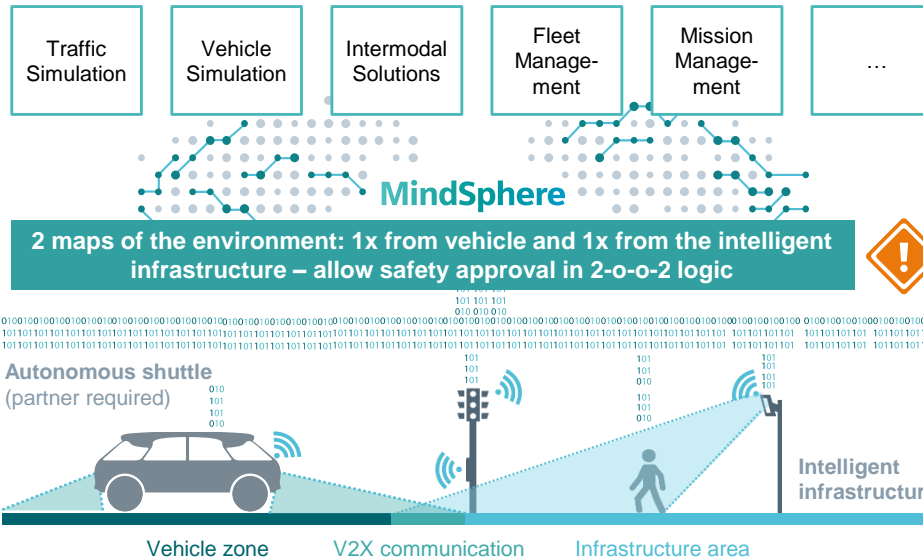

Enhances environmental perception of a shuttle

### Cloud-based Software platform

Simulation, intermodal solutions, fleet management

## System

Cloud-based Software platform

## Customer benefits

**Significant OPEX reduction**  
>60% lower costs compared to conventional bus

**Faster homologation –**  
Significantly faster compared to systems w/o infrastructure support

**Technology boost**  
Cities and PTOs become competitive against Uber, Lyft, etc.

**Vehicle agnostic system**  
Integration of different autonomous shuttles

# Intelligent infrastructure for AVs – Valuable information from the road-side for specific situations

## Roadway junction

## Roadway connectivity

## Steep hill scenario

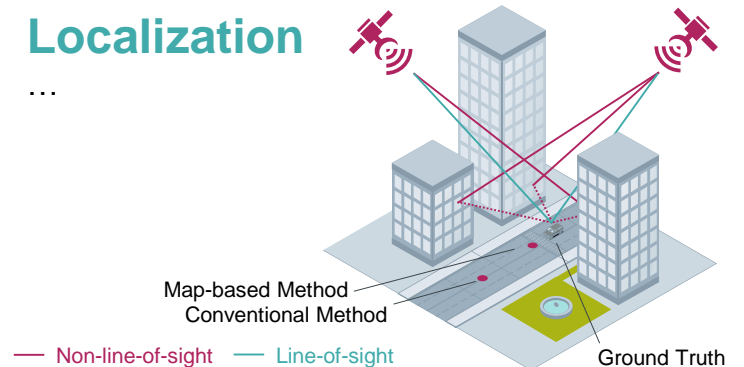

## Hairpin turn

## “Sun blinding” of sensors

## Localization

Higher road safety

Increased road efficiency

Mobility system improvements

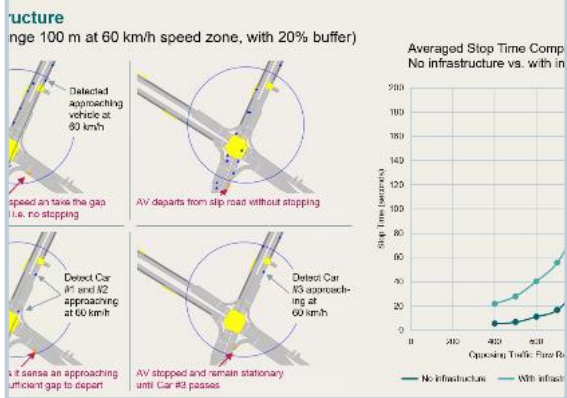

# Cloud-based Software platform – End-to-end suite for autonomous driving systems

**SIEMENS**  
*Ingenuity for life*

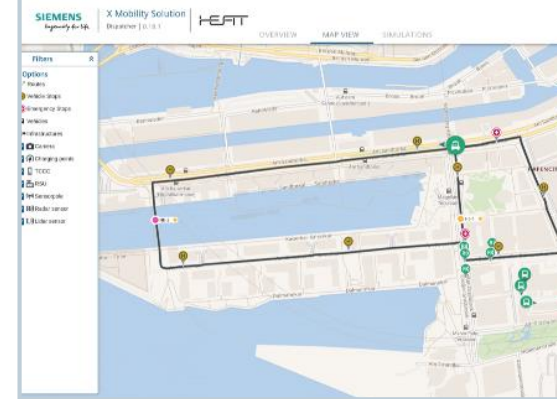

## Traffic Simulation

## Vehicle Simulation

## Mobility Management

## Intermodal Solutions

Drive new product development

Use the strengths of the Siemens eco-system

# Strategic projects – Together in an eco-system of partners

## Urban

### Munich OTS 1.0

### Singapore CETRAN, etc.

### Hamburg HEAT

## Interurban

### KoRa9

## Other projects

### Rail adaption Potsdam

# CETRAN – We showcase live our capabilities

**Centre of Excellence for Testing and Research  
of Autonomous Vehicles NTU (CETRAN)**

## Intelligent infrastructure

Use cases to demonstrate the added-value of the intelligent infrastructure

- Mobility on-Demand
- Green Wave
- Overtaking Obstacles
- Red Light Violation by Pedestrian
- Parking/street use optimization

---

## Cloud-based Software platform

Operator and technical view

- Dispatcher App
- Incident/Notification App
- Asset Management
- Virtual Testing Visualization
- Digital Twin Visualization
- Raw Data

# THANK YOU

---
