

Carbon Calculator

5 Minutes to A Greener World: Fast CO₂e Calculation, Responsible Applications!

Why

The EOS' Purpose is to accelerate the world's transition to responsible manufacturing. Therefore, EOS offers Responsible Products that support you with your sustainability journey!

What

We offer an online tool that lets you customize your case, connect carbon footprint estimations to costs per part, play with different scenarios, and create a green business case for your application designs. Furthermore, we continuously update the data quality by doing internal measurements and external studies.

How

Get the Carbon Calculator for currently 1.250 Euro per year – special offer! It's available on EOS Store. All you need to do is click on "Add to cart" and use a credit card for your purchase.

What value does the tool offer?

The carbon calculator provides the possibility to estimate carbon emissions and shadow pricing to ultimately help customers reduce their carbon footprint and drive green business cases.

Customization

Create a carbon emissions report suited to your specific industry and region.

Scenario Analysis

See the impact of changing different levers to enable data driven decision making in reducing carbon emissions.

Shadow Pricing

See the economical impact of carbon emissions with regulations expected to come in the future for the company.

Value for Tomorrow

Optimize the design, costs and footprint to create a green business case for your application.
