Siemens Healthineers – The new brand for Siemens’ healthcare business

Today Siemens Healthcare unveiled its new brand name Siemens Healthineers. The new brand underlines Siemens Healthcare’s pioneering spirit and its engineering expertise in the healthcare industry. It is unique and bold and best describes the Healthcare organization and its people – the people accompanying, serving and inspiring customers – the people behind outstanding products and solutions.

“We have an exceptional track record of engineering and scientific excellence and are consistently at the forefront of developing innovative clinical solutions that enable providers to offer efficient, high quality patient care. Going forward as Siemens Healthineers, we will leverage this expertise to provide a wider range of customized clinical solutions that support our customers business holistically. We are confident in our capability to become their inspiring partner on our customers’ journey to success”, explained Bernd Montag, CEO of the company. “Our new brand is a bold signal for our ambition and expresses our identity as a people company – 45,000 employees worldwide who are passionate about empowering healthcare providers to optimally serve their patients.”

As part of its Vision 2020 strategy Siemens AG announced nearly two years ago that its healthcare business would be separately managed as a company within the company with a new organizational setup. Siemens Healthineers will continue to strengthen its leading portfolio across the medical imaging and laboratory diagnostics business while adding new offerings such as managed services, consulting and digital services as well as further technologies in the growing market for therapeutic and molecular diagnostics.
The name of the legal entities will remain unchanged.

Siemens AG (Berlin and Munich) is a global technology powerhouse that has stood for engineering excellence, innovation, quality, reliability and internationality for more than 165 years. The company is active in more than 200 countries, focusing on the areas of electrification, automation and digitalization. One of the world’s largest producers of energy-efficient, resource-saving technologies, Siemens is No. 1 in offshore wind turbine construction, a leading supplier of gas and steam turbines for power generation, a major provider of power transmission solutions and a pioneer in infrastructure solutions as well as automation, drive and software solutions for industry. The company is also a leading provider of medical imaging equipment – such as computed tomography and magnetic resonance imaging systems – and a leader in laboratory diagnostics as well as clinical IT. In fiscal 2015, which ended on September 30, 2015, Siemens generated revenue of €75.6 billion and net income of €7.4 billion. At the end of September 2015, the company had around 348,000 employees worldwide. Further information is available on the Internet at www.siemens.com.
