PT. TRAFOINDO POWER INDONESIA  
— a TRAFOINDO and SIEMENS company —

# POWER TRANSFORMER

## Up to 275 kV

A product from PT. Trafoindo Power Indonesia

### ABOUT THE COMPANY

**PT. TRAFOINDO POWER INDONESIA** is a joint venture company between PT. Trafoindo Prima Perkasa and Siemens.

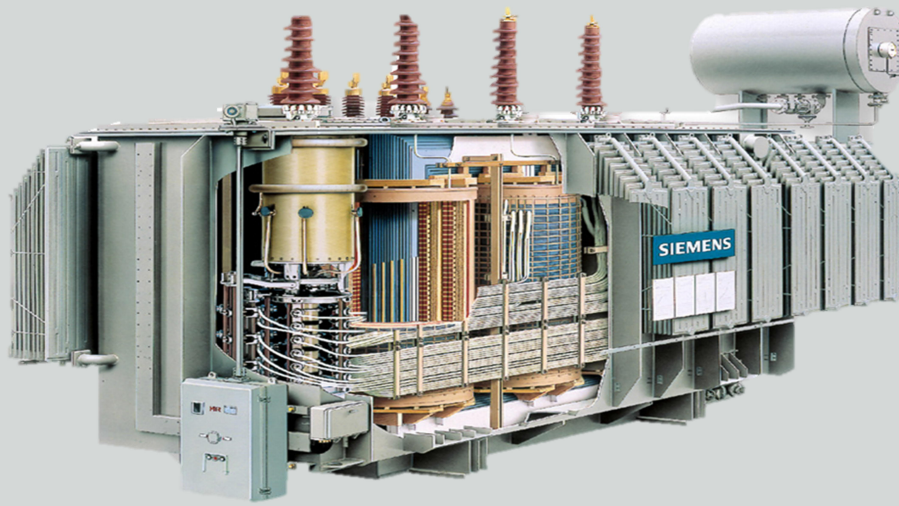

By combining the experience in producing high quality distribution transformers of PT. Trafoindo Prima Perkasa as Indonesia's leader in the field, with the internationally standardized know-how of Siemens, we are able to locally manufacture power transformers of the highest quality.

Our factory, located in Tangerang, is equipped with state-of-the-art facilities and technologies to support complete production and product testing to ensure a high quality and reliable power transformer.

We also contribute to the local industry through technology transfer via "train the trainer" program held in Wuhan, China.

In its initial phase, the company also employed local workforce of as much as 200 people.

By utilizing our expertise and resources, we are confident that we are able to manufacture our products with 30% local content. Meanwhile, our expanded reach in terms of customer network also helps us in serving the Southeast Asian market for electrification demands. We are a local company with an international mindset.

## POWER TRANSFORMER

### Up to 275 kV

#### SPECIFICATIONS

- With capacity from > 5 up to 100 MVA ; < 275 kV Voltage Level.
- Conservator Type

#### ADVANTAGES

- Tailored to meet specific customer needs
- Daily savings with efficient transformers
- Investment pay-offs
- Eco-friendly

Our power transformer products ensure daily savings for customers in capital expenditure for regional manufacturing plant setup and for acquiring the broad experience and in-depth knowledge required for custom unit designs.

The benefits of minimized failure rate and losses, on the other hand, translate into savings in operational expenditure.

Our state-of-the art transformer applications strengthen our customers' investment security, while also ensure CO<sup>2</sup> reduction for eco-friendly products.

## LARGE DISTRIBUTION TRANSFORMER

#### SPECIFICATIONS

- With capacity from > 4 up to 40 MVA ; < 36 kV Voltage Level.
- Hermetically Sealed; Oil and N<sub>2</sub> Type
- Conservator Type

**PUBLISHED ON** | April 2019
