WHAT

What we do

WHAT

What is Industrial Automation?

Use of control systems to monitor and control industrial processes and machinery.

Automation systems replace repetitive and mechanical tasks.

INTROSYS

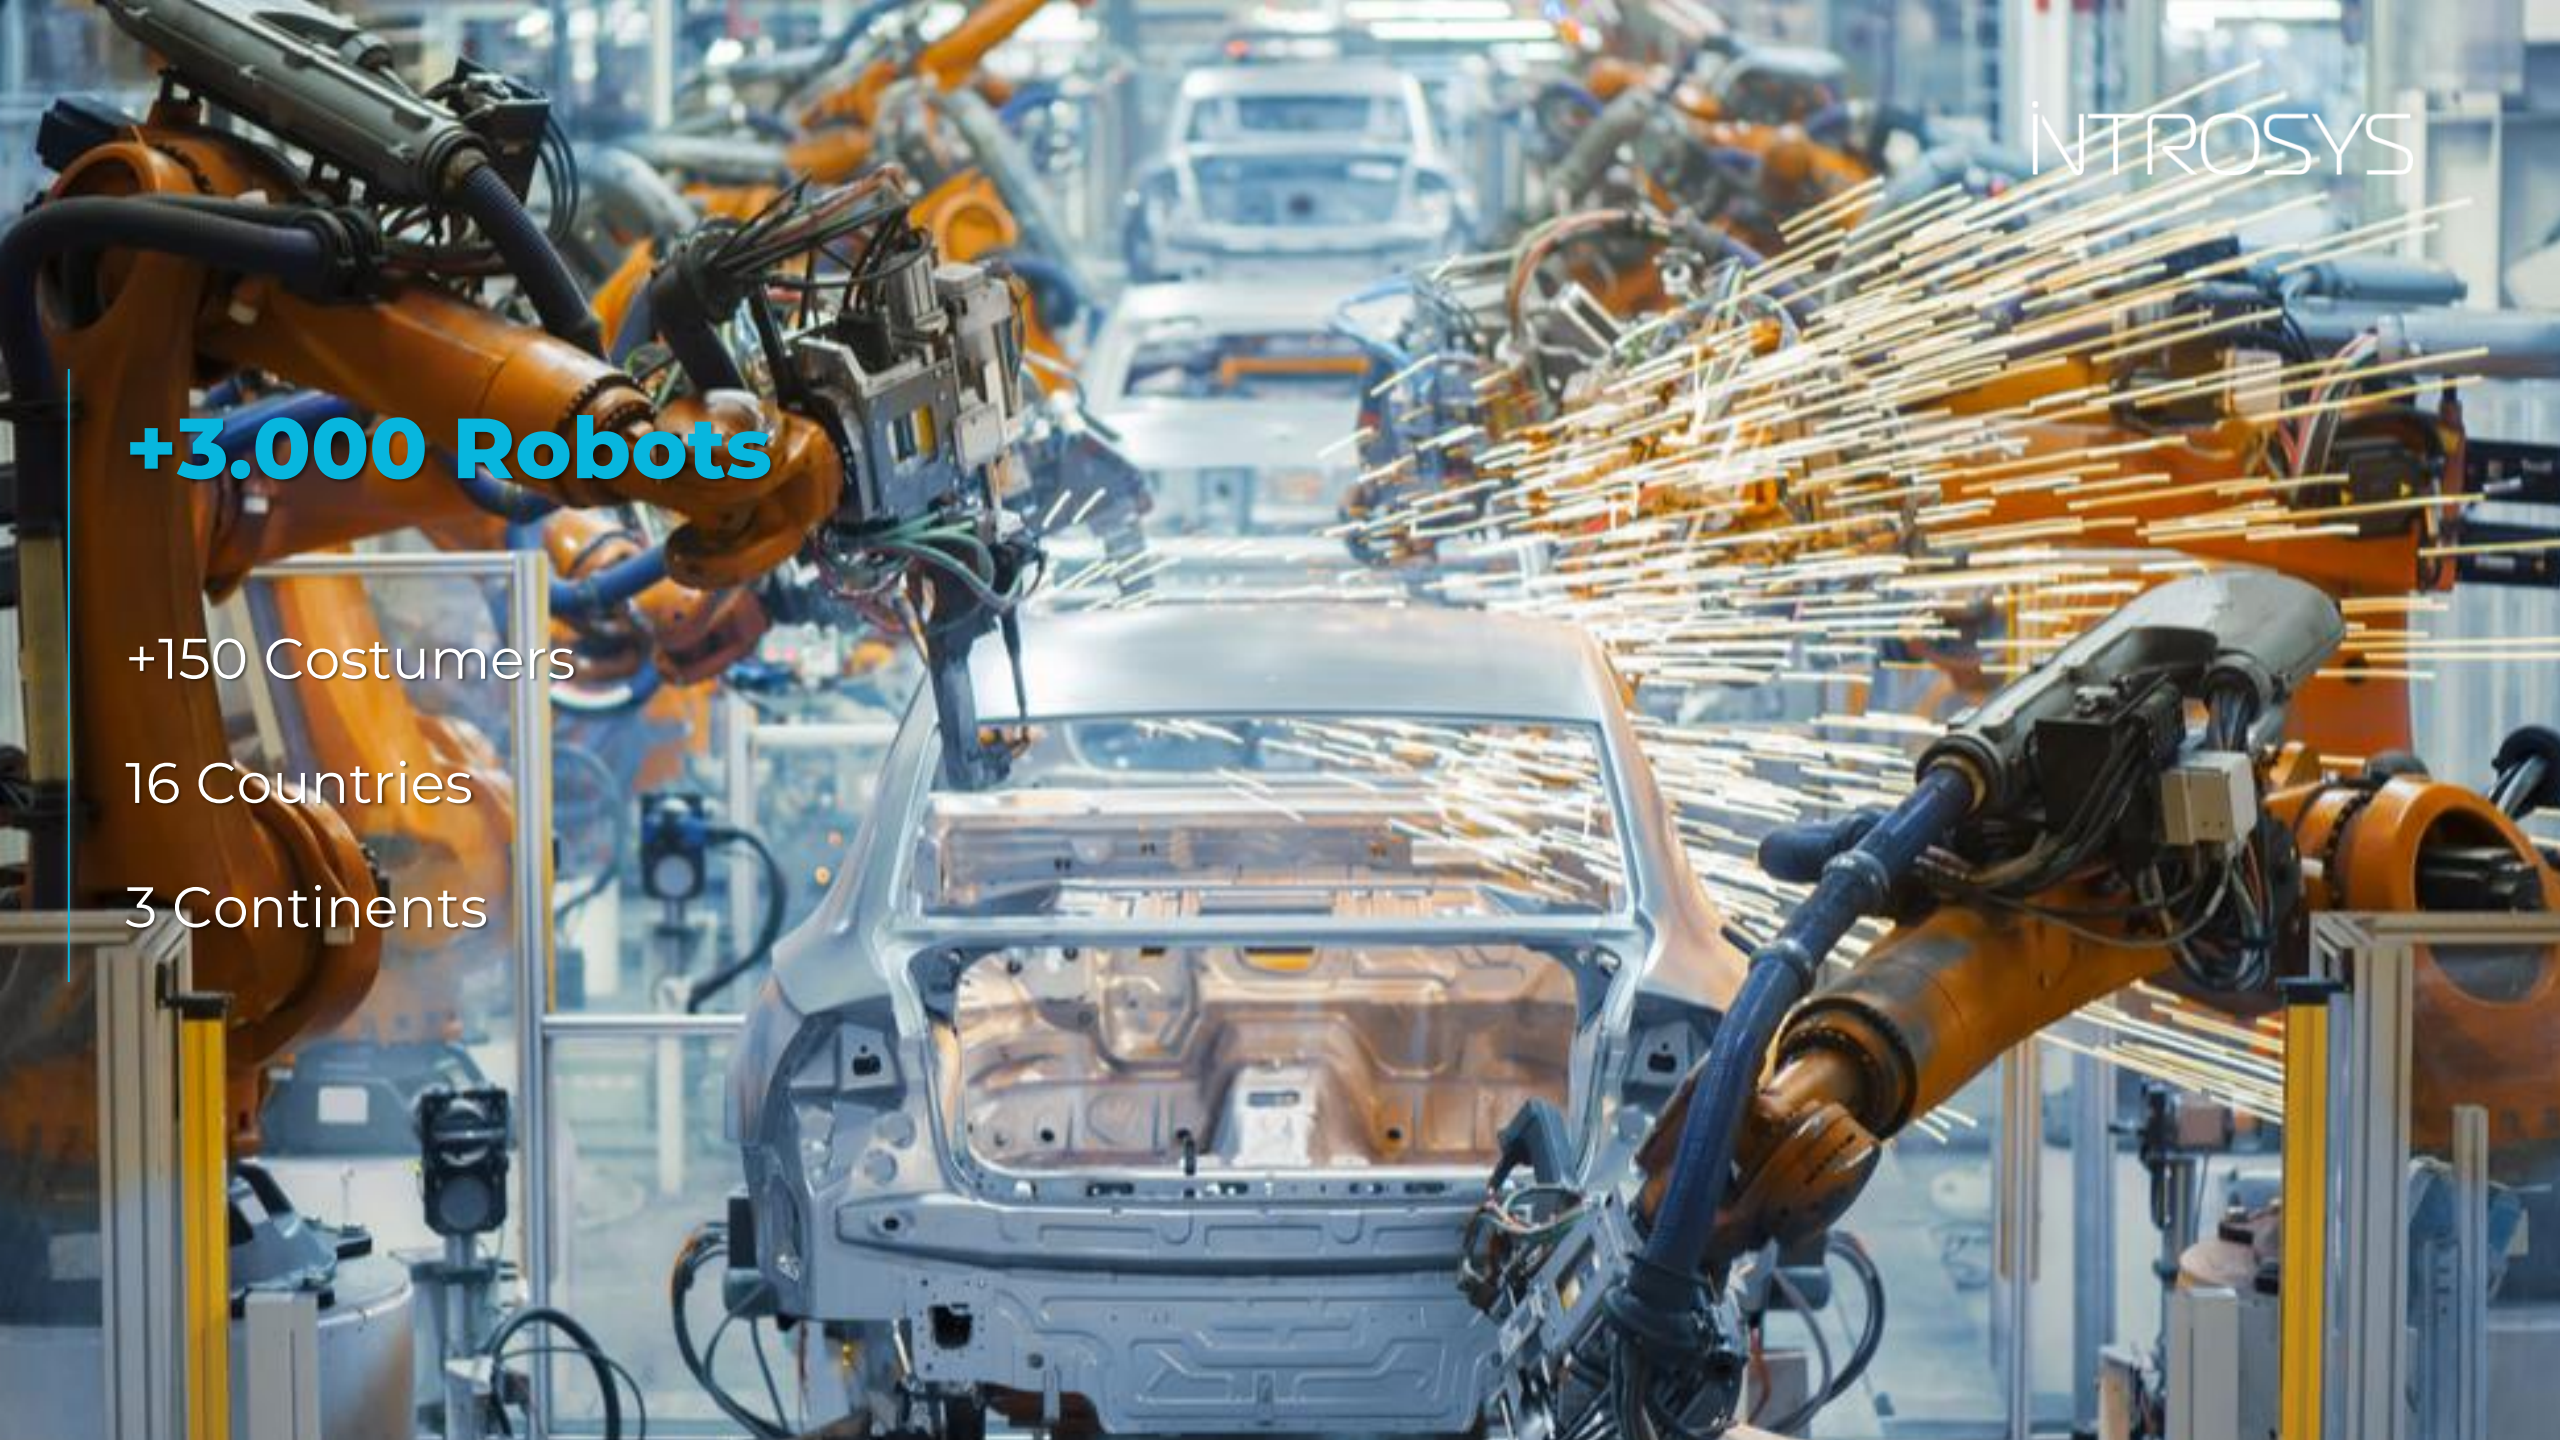

+3.000 Robots

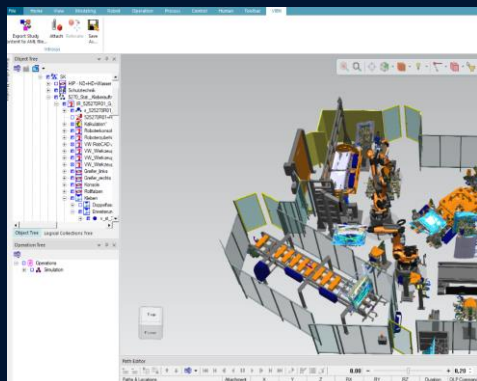

+150 Costumers

16 Countries

3 Continents

WHAT

OEM AUTOMATION PROJECTS

From line conception to
start of production

QUALITY INSPECTION SYSTEMS

Non-destructive quality
inspection vision-based
solutions

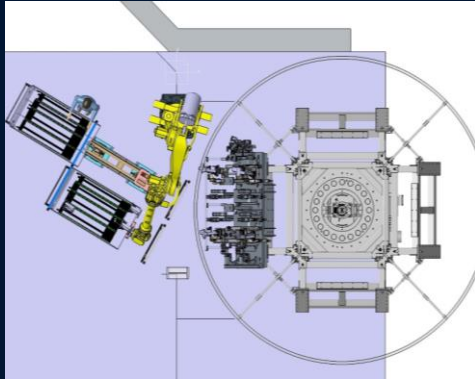

ROBOTIC CELLS

Robotic cells for joining
technologies

INTROSYS

WHAT

CUSTOMIZED SOLUTIONS

- Machine Retrofitting
- Automation & Robotics

LOW VOLTAGE ELECTRIC CABINETS

- Distribution cabinets
- Control & automation cabinets
- Control panels & consoles

INTROSYS

TRAINING ACADEMY

- Robot programming
- PLC programming
- Hardware design

WHAT

R&D PROJECTS

European and National
R&D funded projects

Industry 4.0

- Non-destructive Quality Control Systems
(vision systems, Eddy Currents, AI, Machine learning, other technologies)
- Human-machine & machine to machine interaction
for industrial applications
- Plug-and-produce technologies for agile and flexible
productive process
