Mandatory Disclosures

Siemens' decarbonization commitments

Creating impact together: your role in the net-zero journey

Commitment towards a net-zero pathway and the establishment of science-based, emission reduction targets, e.g., SBTi

Emission reduction via continuous implementation of measures, and annual tracking in the Carbon Web Assessment (if invited)

Active promotion of decarbonization in your manufacturing processes and supply chain, including raw materials

Sustainable products Share and collaborate with us on sustainable innovations and low-carbon and eco-friendlier alternatives

What's in for you?

Your efforts will be recognized by Siemens, as the CO₂e footprint and reduction initiatives of our suppliers increasingly influence our sourcing decisions.
