

-  **Cost effective**
-  **AI Powered**
-  **Scalable**
-  **Easy to deploy**
-  **Searchable Meta Data**
-  **VMS Integration**

AerWatch® is a groundbreaking solution for landmarks, ensuring the safety and preserving of heritage and enhancing the visitor experience. With continuous monitoring and real-time alerts, landmarks operators can swiftly respond to potential security breaches. The system's adaptive AI minimises false alarms, focusing on critical events, while seamless integration with existing security measures enhances overall security effectiveness.

AerWatch® enhances landmarks operations and security through advanced AI-powered surveillance. It provides accurate visitor counting, demographics, and engagement metrics, while monitoring waiting times and optimising facility usage. The system generates detailed heatmaps of dwell times, identifying key point of interest and guiding curation decisions. For security, **AerWatch®** vigilantly detects unauthorised access, trespassing, loitering, attempting suicide and vandalism, ensuring the safety of both visitors and heritage.

This comprehensive solution significantly improves visitor experience and operational efficiency, allowing landmarks operators to better preserve and showcase cultural heritage. By balancing robust security measures with insightful analytics, **AerWatch®** empowers landmarks operators to create more engaging, safe, and well-managed cultural spaces.
