

Assembly hourly rates valid from May 1st, 2022

In accordance with the protocol on the conclusion of the collective agreement for the electrical and electronics industry 2022 dated May 6th, 2022, an increase of 5.0% in the collective minimum wages and salaries was agreed. Taking this agreement into account, the following hourly rates will apply starting May 1st, 2022:

Charge rates according to the terms of assembly works of Siemens AG Austria, Smart Infrastructure – RSS

I. Charge rates for On-site installations:	Normal hourly rate EUR
Project manager	158.43
System technician for systems with service contract	139.38
System technician for systems without service contract	215,87
Software technician for systems with service contract	158,43
Software technician for systems without service contract	246.69

II. Charge rates for Off-site installations:	Normal hourly rate EUR
Project manager	164.78
System technician for systems with service contract	146.27
System technician for systems without service contract	224,28
Software technician for systems with service contract	164,78
Software technician for systems without service contract	253.59

Normal hours (weekdays): Monday - Thursday from 07:00 to 16:30; Friday from 07:00 to 13:00.

The overtime surcharge is 40% of the normal hourly rate. The night hours, Sunday and public holiday hours surcharge is 80% on the normal hourly rate.

The travel time will be paid for in the actual amount incurred and the mileage allowance will also be charged in accordance with the terms of assembly works.

Possible accommodation costs will be charged in the actual amount.

By way of derogation, specific flat rates can be given priority for delimited areas of application by means of special conditions.

The smallest billing unit is ½ hour.

These hourly rates do not include the VAT.

Insofar as the rates refer to the terms of assembly works, these are the terms of assembly works of Siemens AG Austria, Smart Infrastructure - RSS in the latest valid version (<https://asc.siemens.at/recht>).
