Active Break – What's that?

An Active Break is a short active session to improve mobility and to build strength.

It includes varied exercises to ensure physical balance and bring activity into your work break.

Active Breaks counteract one-sided and strenuous posture and movement patterns. They help you train the cardiovascular system, improve circulation as well as release and prevent muscular tension.

On top of that, Active Breaks promote group dynamics and team development and help strengthen the mutual health culture at the workplace.

Prevention at the workplace
