

Siemens maintains a leading position as IoT platform provider for smart buildings

- **Independent analyst firm ranks Siemens Smart Infrastructure as a leader in IoT platforms for smart buildings**

Siemens Smart Infrastructure has been ranked as a leading provider of IoT platforms for smart buildings by independent analyst firm Verdantix. The latest edition of Verdantix's 'Green Quadrant: IoT Platforms for Smart Buildings 2022' report analyzed 17 IoT platforms for smart buildings, and evaluated Siemens Smart Infrastructure to be among the leading providers of IoT technology which addresses key priorities for real estate leaders.

According to the report, cost reduction, occupant wellbeing and building decarbonization are the foremost strategic objectives of corporate real estate executives in the next three years.

"We're pleased to once again be recognized by Verdantix as a leader in IoT, as we continue to strengthen our portfolio of digital solutions and services for smart buildings," said Dave Hopping, CEO, Solutions and Services, Siemens Smart Infrastructure. "As our cities become increasingly complex, building owners and operators are turning to digital tools to maximize the efficiency of their investments, comply with market-specific regulations and create better experiences for people. By intelligently applying the right technology, we aim to support our customers in achieving the right outcomes for their business."

The report noted that Siemens offers a comprehensive suite of IoT solutions for smart buildings, with particular strengths in energy management of buildings and assets, workplace services and space monitoring and analysis. Verdantix's research

also indicates that advanced analytics and improvements in connectivity will motivate the future adoption of building IoT solutions.

“Greater ability to connect, collect and analyze data through IoT platforms is really driving us beyond single use cases, towards comprehensive digital services for buildings,” said Hopping. “By combining datasets from multiple use cases, we’re able to gain greater transparency into building operations and occupant behavior, to inform strategy for decarbonization, building operation and performance, and user-centricity. Digital services are the key to creating buildings which interact, learn and adapt.”

Siemens Smart Infrastructure (SI) is shaping the market for intelligent, adaptive infrastructure for today and the future. It addresses the pressing challenges of urbanization and climate change by connecting energy systems, buildings and industries. SI provides customers with a comprehensive end-to-end portfolio from a single source – with products, systems, solutions and services from the point of power generation all the way to consumption. With an increasingly digitalized ecosystem, it helps customers thrive and communities progress while contributing toward protecting the planet. Siemens Smart Infrastructure has its global headquarters in Zug, Switzerland. As of September 30, 2021, the business had around 70,400 employees worldwide.

Siemens AG (Berlin and Munich) is a technology company focused on industry, infrastructure, transport, and healthcare. From more resource-efficient factories, resilient supply chains, and smarter buildings and grids, to cleaner and more comfortable transportation as well as advanced healthcare, the company creates technology with purpose adding real value for customers. By combining the real and the digital worlds, Siemens empowers its customers to transform their industries and markets, helping them to transform the everyday for billions of people. Siemens also owns a majority stake in the publicly listed company Siemens Healthineers, a globally leading medical technology provider shaping the future of healthcare. In addition, Siemens holds a minority stake in Siemens Energy, a global leader in the transmission and generation of electrical power. In fiscal 2021, which ended on September 30, 2021, the Siemens Group generated revenue of €62.3 billion and net income of €6.7 billion. As of September 30, 2021, the company had around 303,000 employees worldwide. Further information is available on the Internet at www.siemens.com.
