Enabling the future of industry

As a Business Unit of Siemens Digital Industries, Siemens **Digital Industries Software** focuses on delivering industrial software and solutions. Key areas include Product Lifecycle Management (PLM) and low-code tools. The offerings support design, development and manufacture for industry, from chips to entire systems, from products to processes, across all industries.

SIEMENS

About Siemens Digital Industries Software

- Siemens Digital Industries Software is a Business Unit within Siemens Digital Industries, responsible for **delivering industrial software and digital solutions** to customers across a wide range of industries.
- Siemens Digital Industries Software helps organizations of **all sizes digitally transform using software, hardware and services from the Siemens Xcelerator business platform**.
- Siemens' software and the comprehensive digital twin enable companies to optimize their design, engineering and manufacturing processes to turn today's ideas into the sustainable products of the future.
- Solutions offered span the full spectrum of product domains – mechanical, electronic, electrical and software domains, enabling end-to-end innovation across industrial processes.
- Key areas of **expertise** include:
- Product Lifecycle Management (PLM)
- Siemens Digital Industries Software serves various **industries** including:
- Automotive
- Aerospace & Defense
    - o Electronics and semiconductors
    - o Industrial machinery and heavy equipment
    - o Medical devices and pharmaceuticals
- Batteries and energy
- Consumer products
- Consumer packaged goods (CPG)

Key product groups

- **Designcenter software:** Helps companies of all sizes to evolve and explore opportunities for innovation at a rapid pace by combining the physical world with an AI-enhanced digital twin.

- **Teamcenter® software:** Product lifecycle management (PLM) solutions to help plan, develop and deliver innovative products.

- **Simcenter™ software:** Helps engineers to develop the best possible products using the powerful predictive simulation and test applications.

- **Mendix™ low-code platform:** An industry-leading low-code application development platform to help organizations around the world reimagine the way they develop applications.
