3D AIR

3D AIR is the newest generation of our touchless fingerprint scanner: fast & accurate using unique TBS 3D sensor technology.

The 3D AIR has many potential uses and is already being employed in a variety of industries, including:

Data Centres

Financial Institutions

Government

Healthcare

TOUCHLESS CAPTURE

- No finger deformation by touch or partial readings
- Always able to read fingers irrespective of condition
- No wear and tear

NO FAILURE TO ENROLL

- 3 cameras scan fingerprint from different angles
- Insensitive to finger position and pressure
- Very low false rejection

HIGHEST SECURITY

- Large scan area captures more minutiae points
- Liveness detection
- More than fingerprint: finger imaging

LARGE DATABASE CAPACITY

- 10'000 fingers in identification mode 1:N (extensible to 20'000)
- 100'000 fingers in verification mode 1:1
