

Siemens Mobility is giving \$15,000 to the Food Bank of Delaware

Siemens Mobility is making a \$15,000 donation to the Food Bank of Delaware to support the friends, local heroes and communities where its employees live and work.

Siemens Mobility's customer service employees based in New Castle help monitor and service the performance of trains that run up and down the busy Northeast corridor, utilizing the latest in digital monitoring and predictive maintenance technology.

"We are so grateful for Siemens' generosity as we work to address increased demands for food assistance as a result of the COVID19 crisis," said Food Bank of Delaware Chief Development Officer Larry Haas. "This donation will enable us to provide 45,000 meals to Delawareans in need."

"We have always been grateful to local communities and businesses and the important support they provide our employees and their families who call the New Castle area home," said Michael Tyler, Head of Customer Service for Siemens Mobility in North America. "Now more than ever, we need to unite and support our neighbors."

With more than 3,500 employees throughout the United States, each of these communities support Siemens Mobility employees who live and work in these areas. In total, food banks in 10 different communities around the country are receiving a total of \$150,000. The food banks will receive the donations over the next few weeks and will be free to use the funding however they deem it is most needed.

Siemens Mobility provides rail vehicles, locomotives, components and systems to more than 30 transit agencies and cities such as Atlanta, Boston, Charlotte, Denver, Houston, Minneapolis, New York, Philadelphia, Portland, Sacramento, Salt Lake City, San Diego, Seattle and St. Louis. Our Intelligent Traffic Systems (ITS) equipment make up 1/3 of all traffic controllers in the U.S. Siemens Mobility is an “essential” business as defined by the Department of Homeland security with employees hard at work to ensure that critical rail and road infrastructure continues to operate throughout the country.

Siemens Mobility efforts complement Siemens’ and Siemens Healthineers’ collective efforts to combat COVID-19 in the U.S. by supporting critical infrastructure and by helping state and local governments address urgent healthcare needs. The company’s employees are maintaining essential operations to support hospitals, power plants, government facilities, military sites, manufacturing locations and data centers. They’re also supporting critical city services such as transportation, water and waste, and national security emergency response systems. Additionally, Siemens Foundation announced it is providing \$1.5 million to community health centers for COVID-19 response efforts.
