

SIEMENS

EFFICIENT. SECURE. FUTURE-PROOF.

SINAMICS G220

The high-performance variable frequency drive for all industries

Table of contents

Meet current and future challenges in motion control

Most objectives in motion control involve increasing productivity and availability – not only right now, but also years down the line. SINAMICS G220 is an innovative variable frequency drive that enables you to meet these objectives. As the first SINAMICS drive to join the Siemens Xcelerator portfolio, the Siemens-wide business platform for digital transformation, SINAMICS G220 is equipped with the necessary functions to make your applications more efficient, secure and future-proof.

Key benefits

Ease of use with user-friendly configuring, commissioning and engineering

Secure technology, guaranteeing safe and reliable operation

Energy efficiency, making your applications more sustainable

Future-proof solution, opening up new possibilities via digitalization

Safety Integrated functions for personnel and plant protection

Perfect fit for use in all industries

Reduce selection and commissioning times

SINAMICS G220 is compatible with most of our proven engineering tools. All of them are easy to use, which shortens selection and commissioning times. If you require additional functionalities, you can easily upgrade the hardware or add software options. For a fast and convenient support service, all product information is available digitally via the QR code.

Scan this code or click on this link for more information

Selection tools

- Our **SINAMICS Selector** app guides you to the right frequency drive.
- **Siemens Product Configurator (SPC)** and **TIA Selection Tool (TST)** help you configure your drive and mechanical system.

Commissioning tools

- The **integrated web server** enables efficient set up, fast diagnostics and maintenance via a wide range of clients. The SINAMICS Smart Adapter enables Wi-Fi access from your smart devices.
- **SINAMICS Startdrive** in TIA Portal provides you with step-by-step instructions for commissioning and integrating the system in an automated environment.
- Integration into a **PCS7 / neo environment via SIMATIC PDM** ensures that your application runs smoothly.

Enjoy a new level of efficiency

In addition to streamlining the selection and commissioning process, SINAMICS G220 increases productivity and energy efficiency in the operating phase. This reduces both operating costs and CO₂ emissions, making your applications more sustainable.

Reduce harmonics with Clean Power technology

Protect your power network by meeting the most stringent harmonic standards with SINAMICS G220 Clean Power. The integrated Active Infeed Unit keeps harmonics to a minimum (THDi <5%). This also reduces energy losses in the system.

Achieve optimal dynamics with SINAMICS Motor Control Extended

The drive system offers best-in-class motor control, which allows you to achieve optimal dynamics and be more energy efficient. Synchronous reluctance motors can be optimally controlled, even if they are near standstill or have a high load torque.

Integration in TIA Portal and Industrial Edge

- Increase productivity thanks to seamless interaction with SIMATIC PLCs and HMI
- Save time and resources in the design phase by using the digital twin and SINAMICS DriveSim Advanced
- Optimize processes based on more transparent drive train and application data

Individual features for more productivity and sustainability

- Support for high-efficiency motors including IE5
- Fast PROFINET RT/IRT connection and MRP/MRPD/S2 redundancy via the plug-in communication module
- Designed for long cable lengths, integrated DC-link choke in all power ratings, optional EMC filter and energy-saving functions

Optimal extruder operation relies on the capacity control provided by SINAMICS G220, ensuring both flexibility and energy efficiency.

up to **80%** space saving

Rely on **safe and secure technology**

To keep your machines running smoothly, SINAMICS G220 includes comprehensive functions for machine safety and cybersecurity. All Safety Integrated functions can be directly controlled via PROFIsafe and the terminals, while Security Integrated can be easily managed via the Security wizard, including through User Management & Access Control (UMAC).

Protect personnel and plants with Safety Integrated

- SINAMICS G220 includes safety functions up to safety integrity level (SIL) 3/performance level (PL) e/Category 4. Commissioning and testing these functions is now much easier thanks to the improved usability concept. Additionally, test stops are now done automatically.
- For additional safety, Safe Torque Off (STO) is pre-commissioned and immediately ready for use.
- With Safe Motor Temperature (SMT), the drive is suitable for applications in ATEX environments. The input for PTC sensors is ATEX-certified, ensuring thermal motor protection.
- Extended safety functions can be added easily through software options:
 - SLS (Safely-Limited Speed)
 - SDI (Safe Direction)
 - SSM (Safe Speed Monitor)
 - SS1 (Safe Stop 1)

Keep systems and data safe with Security Integrated

- Combining plant security, network security and system integrity, Security Integrated is a defense-in-depth concept that shields your applications from any cybersecurity threats.
- By default, only necessary functions are enabled in the factory settings and they are preconfigured with secure settings.
- Security Integrated ensures safe communication between the drive and TIA Portal or web clients.
- Integrity and authenticity checks prevent the installation of manipulated firmware.

Ensure availability in harsh environments with a high protection class

- SINAMICS G220 is available with IP55 protection, which protects the drive from dust or water.
- 3C3 coating on electronic components makes them extremely robust, ensuring longer lifetimes in corrosive environments.
- PROFINET S2 system redundancy guarantees the availability of your systems.

SINAMICS G220 is ideally suited for centrifuge applications – separating the components of a mixture based on their size and density at high speed.

Future-proof your applications

SINAMICS G220 offers digital tools and services to streamline processes in each phase, making them more time and cost-efficient. Thanks to additional hardware modules and an expandable software portfolio, SINAMICS G220 meets the specific requirements to future-proof your business.

Accelerate time-to-market with the digital twin

- SINAMICS G220 allows for easy and fast design and commissioning thanks to the digital twin. This way, you can test the drive's behavior, identify any issues and make adjustments in the design phase – without requiring any hardware.
- The digital twin is available in SINAMICS Startdrive (TIA Portal) with DriveSim Engineer, which is the ultimate solution for optimizing your drive system.

Optimize your drive and plants with the IIoT Option Module

- SINAMICS G220 can be easily connected to the Industrial Edge ecosystem via the IIoT option module. This module exchanges high frequency data between the drive and Industrial Edge, increasing transparency and providing valuable insights.
- This data can be used for extensive monitoring and diagnostics, which provide the basis for improving the system and boosting its reliability.

- In addition, the insights that are gathered from this data and analyzed via Drivetrain Analyzer Edge can be used for predictive maintenance and prevent downtime.

Enjoy maximum flexibility with hardware and software options

- To fulfill specific requirements, SINAMICS G220 is customizable with communication modules and option modules. They can be easily plugged into the drive and swapped out if any of your requirements change.
- While the majority of SINAMICS Drive Software functions are already included in the firmware, additional software options are available for specific needs. SINAMICS Safety Integrated Extended offers additional safety functions while SINAMICS Motor Control Extended enhances motor performance.
- All offerings are part of included in a seamless portfolio that complies with global standards. As a result, SINAMICS G220 can be implemented in any plant worldwide.

SINAMICS G220 is well-suited for mixer applications, producing smooth and homogeneous products.

Digitalization is the key to making processes more efficient, increasing machine availability and streamlining workflows.

The perfect fit for all industries

Thanks to its comprehensive features and innovative design, SINAMICS G220 is suitable for various industries, including processing, manufacturing, and marine. It can be implemented in moving, processing, pumping, ventilating, compressing, and positioning applications, meeting even the most stringent requirements.

Food & Beverage

With SINAMICS G220, we are providing the food and beverage industry with a drive solution that allows them to meet individual customer requirements quickly, flexibly and in the highest quality. In addition, the drive ensures that all processes are energy-efficient and reliable.

Pharma

The pharmaceutical industry is characterized by fast changes and requires a drive system that can match this pace. Thanks to its flexible design, SINAMICS G220 can be easily adapted to changing requirements. Its communication redundancy and security enable reliable production for users while energy efficiency gives users a competitive edge.

Chemicals

Applications in the chemical industry need to be robust, reliable and safe, meaning that the same applies to the drive systems. SINAMICS G220 offers 3C3 coating and IP55 protection, which makes it fit for use in harsh environments. To further increase reliability, SINAMICS G220 supports S2 redundancy.

Oil & Gas

High levels of efficiency and safety are crucial in the oil and gas industry – SINAMICS G220 can fulfill both requirements. Security Integrated ensures system availability and Safety Integrated functions keep people and machines safe, even in ATEX environments.

Marine

Harmonics need to be strictly limited in the marine industry, which is why SINAMICS G220 Clean Power is the ideal drive solution for auxiliary applications, such as deck machinery or winches. It reduces harmonics and thereby also lowers system losses, increasing the energy efficiency of applications and improving their environmental footprint.

Technical data

System	Drive Offerings			
	IP20	IP55	IP20*	IP55*
				
Drive variant	SINAMICS G220		SINAMICS G220 Clean Power*	
Supply voltage / power kW (hp)				
3AC 200 ... 240V	0.55 – 30 kW / 0.75 – 40 hp	1.1 – 30 kW / 1.5 – 40 hp		
3AC 380 ... 500V	1.1 – 55 kW / 1.5 – 75 hp	1.1 – 55 kW / 1.5 – 75 hp	7.5 – 55 kW / 10 – 75 hp	7.5 – 55 kW / 10 – 75 hp
3AC 525 ... 690V	3 – 55 kW / 4 – 75 hp	3 – 55 kW / 4 – 75 hp		
Motors supported	Asynchronous motor (induction), synchronous reluctance motor, permanent magnet motor			

Hardware options

Operator panels

SINAMICS SDI Pro 5.5"

Color touch display (5.5"), multilingual operator interface, multi-drive access

Communication modules

CM-PN

PROFINET, Modbus TCP/IP, Ethernet/IP

Wi-Fi access

SINAMICS Smart Adapter

Wi-Fi connection to access the drive via mobile devices (smartphone, tablet, laptop)

Optional modules

OM-DQ (Drive-CLiQ)

Fast connection and setup via two DRIVE-CLiQ ports

OM-IloT (Industrial Internet of Things)

High-frequency data transfer to Industrial Edge

OM-SMT (Safe Motor Temperature)

ATEX-certified input for PTC sensors of motors in Ex-environment

Software options

Safety Extended

SS1, SLS, SSM, SDI

Motor Control Extended

Optimal motor control near standstill

TECHNICAL DATA

SINAMICS G220 is the key to energy-efficient fan operation, while also being reliable and efficient over extended periods of time.

Seamless power range

SINAMICS G220

**SINAMICS G220
Clean Power***

Target verticals	Food and beverage, pharma, oil and gas, chemicals, marine, general machinery	
EMC	C2 (400V)/Removal of functional grounding (IT system) possible, C3 (690V)	C2/Removal of functional grounding (IT system) possible
Cooling	Air cooling using an integrated fan	
Ambient temperatures	IP20: -20 to 45 °C / to 60 °C (> 45°C with derating) IP55: -20 to 40 °C / to 50 °C (> 40°C with derating)	
Motor cable length	150 m (EMC Category C2) / 300 m	
Motor control	U/f, FCC, ECO, vector control encoderless/with encoder, torque control encoderless/with encoder	
Overload capability	HO: 200% 3s, 150% 57s, LO: 150% 3s, 110% 57s every 300s	
Inputs/outputs	6 DI (1 PTI/2 F-DI), 1 F-DI, 3 DO (1 NO 2 NO/NC relay), 1 F-DO, 2 AI, 1 AO, 1 input for PTC/KTY84/Pt100/Pt1000 motor temperature sensor	
Communication	PROFINET (RT/IRT, MRP, MRPD & S2 Redundancy), Modbus TCP/IP, EtherNet/IP	
Safety functions	Integrated: Safe Torque Off (STO), Safe Stop 1 (SS1-t) SIL 3, PL e, Cat. 4 via terminals or PROFIsafe SINAMICS Safety Integrated Extended license: SS1, SLS, SSM, SDI	

* Available soon ** Possible with synchronous reluctance motors and SINAMICS Motor Control Extended license

Efficient usability is achieved through the integrated SINAMICS Smart Drive Interface (SDI Standard)

Rear panel height	695 mm	820 mm
Width	270 mm	327 mm
Depth	284 mm	315 mm
Depth, including repair switch	319 mm	379 mm

Service offerings

To ensure that you are benefiting as much as possible from your SINAMICS G220, we offer a variety of services – from technical support and repairs to extended coverage options. The most comprehensive offering is Service Protect, which includes 7.5 years of extended warranty.

Support and consulting services

- Technical support via phone, e-mail and chat
- **Siemens Industry Online Support App**

Warranty

- Standard: 24 months
- Plus 6 months free of charge (FOC) with product registration via **myregistration.siemens.com**

Spares and repairs, field services

- Spare part exchange as standard
- In-house repair with express repair offering
- Worldwide field service

Added-value services

- Digital services
- Training services
- Service agreements
- Extended manufacturer cover – Service Protect (+3 years or +5 years)
- Retrofit and modernization service
