

# Executive Cybersecurity Forum for Manufacturers

January 28, 2021 | 2:00 – 5:00 PM EST  
Live virtual event

## Biography

**Larry O'Brien**  
ARC

Larry is part of the cybersecurity and smart cities and infrastructure teams at ARC. Larry has a 20-year background in process control, process safety, and field devices/field networks. Over the years, Larry has supported many of our end-user clients in the oil and gas and refining industries and has conducted several supplier selection workshops.

Larry first joined ARC in 1993 and has an extensive background covering control systems, networks, sensors, and software for the industrial and critical infrastructure segments. In addition to over 20 years of market research experience, Larry has participated in many custom consulting engagements with end user and owner/operator clients in these industries, ranging from large scale supplier selection projects to controls strategy development, technology evaluation, custom surveys, and benchmarking.

For the past three years, Larry has been part of both the cybersecurity and smart city practices at ARC and has authored a number of research papers, market reports, and articles on ICS/SCADA cybersecurity and smart city technologies, applications, and best practices. Larry has also made numerous public speaking appearances as both a presenter and MC/moderator for these topics at events such as the ARC Industry Forum, ABB Customer World, Honeywell User Group Meeting, ICSJWG, and ICS Cybersecurity conferences.

**Larry O'Brien**

Mr. O'Brien will be a panelist at the Executive Cybersecurity Forum for Manufacturers.
