

Siemens Financial Services Healthcare Finance in the U.S.

Siemens AG (Berlin and Munich) is a global technology powerhouse that has stood for engineering excellence, innovation, quality, reliability and internationality for 170 years. The company is active around the globe, focusing on the areas of electrification, automation and digitalization. One of the world's largest producers of energy-efficient, resource-saving technologies, Siemens is a leading provider of medical imaging equipment – such as computed tomography and magnetic resonance imaging systems – and a leader in laboratory diagnostics as well as clinical IT.

Every day approximately 1,500,000 people in the United States benefit from medical care in which systems and solutions from Siemens are utilized ([Source](#)). Private funding offers an attractive solution for hospitals and healthcare providers looking to adapt to today's digital industry shift and do so with minimal financial risk. Challenging times require creative solutions and, through the technical and financial expertise of a financier like Siemens Financial Services (SFS), the US can meet its healthcare infrastructure needs in the most affordable manner.

As healthcare organizations continue to face financial pressures from new regulations, providers will look to modernize healthcare infrastructure, technology and services by adapting to today's digital shift. The US healthcare sector requires some serious investments to enable this shift - this is where private funding can step in to help.

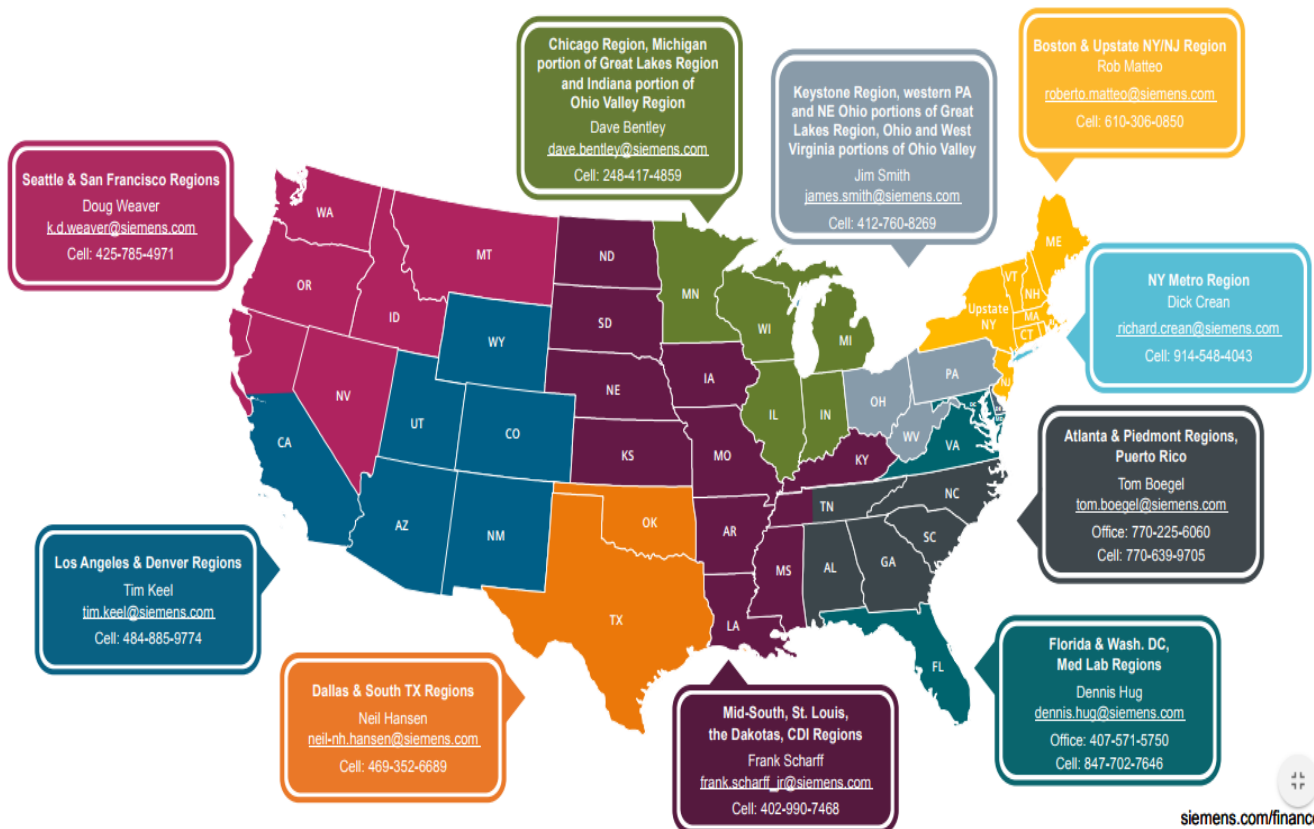

The SFS Division is focused on the successful application of financing and how it can enable healthcare providers to accomplish their clinical and operational goals by embracing digitalization. A digitalized healthcare system has many positive implications for the future, including: improving access to care, optimizing data management for diagnoses and enhancing data connectivity through digital information architecture. From equipment leasing to healthcare infrastructure – SFS is a market leader in financing the next generation of healthcare through digitalization. With 100 offices and 14,000 customers globally, we offer customized solutions that enable healthcare providers to:

- Acquire new technology and upgrade existing equipment affordably
- Expand geographic reach through merger and acquisition projects, such as building or expanding facilities
- Refinance existing debt

- Transform care delivery through new healthcare equipment
- Make use of a wide range of financing techniques to provide minimal project risk, such as leasing or pay-for-outcomes techniques
- Access to a broad portfolio of offerings from graduated payment programs to asset based finance, including:
 - Fair Market Value/Buyout Leases
 - Loans
 - Refinancing and Acquisition Financing
 - Bond Financing
 - Project and Structured Finance
 - Equipment and Technology Finance
 - Construction and Permanent Facility Finance
