

# Fleet Manager for Machine Tools

Connect and manage your machine  
tools around the world

## Data helps you improve maintenance and servicing

Whether you are a machine tools builder or a manufacturer – our MindApp will provide you transparency on the status of your machines anywhere in the world. The Machine Overview clearly shows useful information on the current operation of the machine and the recent productivity history. Additional configuration allows the monitoring of the critical variables to reduce inspection and maintenance costs or offer your customers improved services.

### New business models and increased productivity

With Fleet Manager for Machine Tools our customers have a great starting point for their digitalization journey. It provides them with access to actual utilization of their machine tools and helps to increase their productivity. New opportunities arise in working with suppliers and machine builders!

Dr. Stephan Ihmels, Principal Business  
Development Manager, Siemens Industry Inc.
