Siemens.com.eg

SIEMENS MOBILITY has integrated solutions for urban mobility and for all types of railways lines; Signaling and control technologies, electrification system, rolling stock, turnkey projects, and maintenance services for all railway areas. Our products, solutions and services help customers around Egypt to take better advantage of their current facilities, increase efficiency, reduce operating costs, and improve safety while minimizing their environment impact.

Our Policy includes all our own personnel and activities of the business units that are part of SIEMENS MOBILITY LLC, considering the prevention of risks and the care of environment are the responsibility of each one of their employees.

The commitment for the prevention of Occupational Risks, the care of Environment and the protection of the Health of all SIEMENS MOBILITY employees are the essential elements that integrate and inspire our business policy based on the following principles.

- 1- Guarantee compliance with the legal, occupational, and technological framework and the internal regulations and other interested parties of SIEMENS MOBILITY LLC regarding occupational risk prevention. It corresponds to the hierarchical line and to all employees to ensure scrupulous respect of the legislation and of the internal rules and orders on EHS.
- 2- Encourage the exercise of visible, effective, and permanent leadership, with the participation of each employee, to achieve a work environment free of accidents and diseases. Each person must ensure their own health and safety at work, as well as the impact of their activity on the health and safety of other people and environment.
- 3- Encourage an EHS culture at all levels of the company, through the permanent training of its employees, to involve and mentalize each employee about the impact of their work on the safety of people, processes, facilities and in the environment.
- 4- Develop, apply, and maintain an EHS Management model aimed at the continuous improvement of working conditions to ensure occupational Health and Safety, and Environmental Performance.
- 5- Implement rigorously an EHS Management System to provide Safe and healthy working conditions, prevent pollution and minimize occupational and environmental accidents, as well as occupational diseases.
- 6- Extend the scope of the EHS Management system to the Customers, contractors, introducing the EHS criteria in the homologation of suppliers, the contracts for works, services, and supplies and enabling the appropriate channels of business coordination in this matter.

This policy, which will be distributed to the entire organization, will serve as a guide for the determination of the objectives, which established according to criteria of continues improvement, must ensure compliance with the EHS policy, with the effort and collaboration of all employees, managers, and the support of the management team of the entity.
