

## Objectives of the association

Building and further developing an IoT ecosystem – based on MindSphere

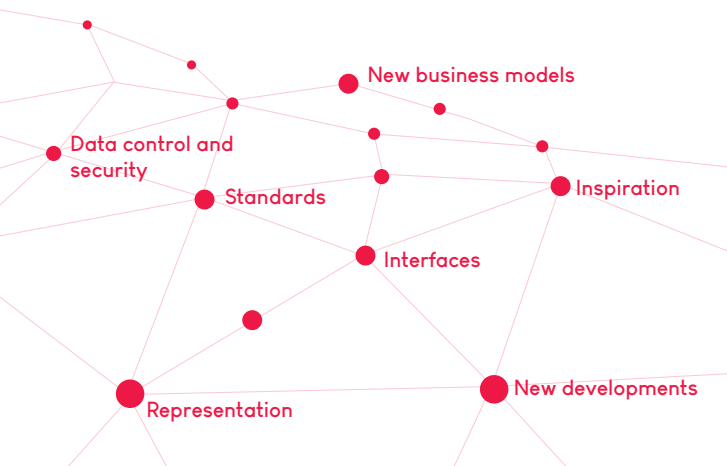

Recommendations on technical requirements for the MindSphere product development for the benefit of users

Supporting members in developing and improving technical solutions on MindSphere and in opening up new markets in the digital economy

Dialog with public and private institutions for shaping public opinion and making decisions

Promoting science and teaching (e.g. in collaboration with universities and developers)

Joint marketing measures and publicity work

# MindSphere | World

Welcome to the world of IoT  
**MindSphere World**  
The IoT community

# MindSphere World – the open community

In MindSphere World companies and research institutions network to jointly shape the future of IoT on the basis of MindSphere.

Together we create value by sharing knowledge, defining standards, and establishing investment security.

## We connect experts from a wide range of industries, such as ...

- Plant manufacturers (EPC)
- System manufacturers
- Product manufacturers
- Universities
- OEMs
- End customers
- System integrators
- Consultants
- Software companies

## As a member, you can ...

... actively shape the further development of the IoT ecosystem based on MindSphere and contribute your experience to create added value.

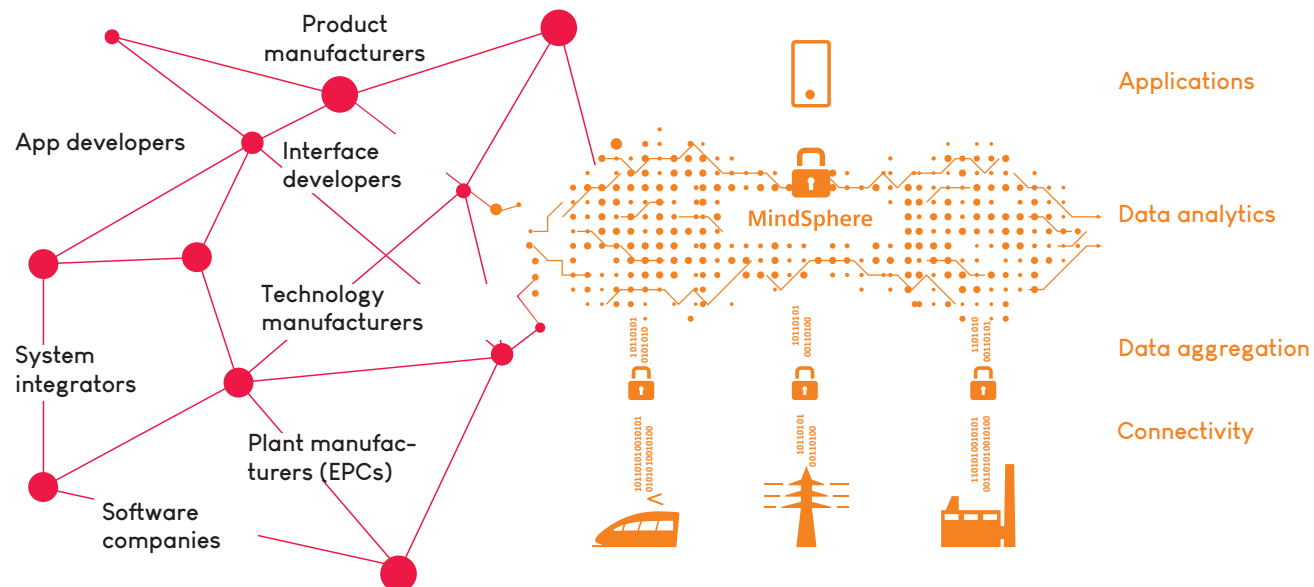

... look beyond your own horizons and use new concepts and creative ideas to advance digitalization within your own company to ensure its competitive strength.

... represent and promote Industry 4.0 within a powerful community.

... play an active role to fully tap the potential of digitalization.

## Come join the MindSphere World community!

We look forward to offering you fresh ideas through your membership and to hearing your creative suggestions.
