

Protecting the campus from water damage

Scenario

Wasted resources

Water leaks and broken pipes can be costly to colleges and universities if not detected quickly

Significance

Water damage

System leaks can easily go unnoticed, and water can be very damaging not only to building structures but also to classroom spaces and assets

Partner

Aquana

Wireless water monitoring and control solution provides leak, burst, freeze, and moisture detection and enables automatic valve shutoff when needed

Integration

Aquana + Desigo CC

Receive critical water system alerts through Desigo CC—including the ability to automatically shut off valves

Benefits

Protecting properties

Facilities engineers receive alerts to protect campuses from water damage to avoid potential interruptions and building closures
