Siemens Canada fully integrates TurboCare Canada Ltd. into Canadian operations

Calgary, AB, July 4, 2013

Integration strengthens brand presence in Alberta

As part of its growing presence in the Western provinces, Siemens Canada will fully integrate Siemens-owned company TurboCare Canada, into their operations. Effective October 1st 2013, TurboCare's Canadian office will operate under the Siemens brand as part of the engineering company's Industry sector.

"This is a good move to benefit our customers," says Michael Gross, Senior Vice-President, Industry Sector, Siemens Canada. "Many of our customers are currently transacting with both Siemens Canada and TurboCare. Under the new structure, customers will deal with one organization to continue receiving the ongoing, excellent service that they have become accustomed to, as well as gain access to the expanded Siemens technology and service portfolio."

Siemens Canada will maintain the current TurboCare workforce of more than 50 employees at locations in Calgary and Edmonton. "Our employees are the heart of this service organization and are our greatest asset," said Gross.

TurboCare Canada, Ltd. was originally acquired by Siemens in 2006 (then Kadon) and specializes in the practical application of advanced repair, engineering, and maintenance technologies to solve industrial machinery problems, with a focus on electric motor repairs, turbomachinery, and mechanical and electrical engineering services. The company's 30-year success in the region speaks to the solid reputation Siemens Canada is looking for in its acquired businesses.

The integration of TurboCare not only strengthens the Siemens brand, but also presents a simplified approach for customers in the region requiring local customer service and support. The move also supports Siemens' long-term goal of expanding the company's customer service footprint in Western Canada. The integration of TurboCare makes the Calgary repair centre location the eighth Siemens Industrial Sales and Service Centre in the country.

In November 2011 Siemens Canada acquired Prairie West Technical Services, a large service organization with facilities in Saskatchewan and Ontario.

About Siemens in Canada

For more than 100 years the innovative ideas from Siemens have helped make Canada a better place. From the Atlantic to Pacific oceans, more than 4,500 employees in Canada work together to provide answers that last in the fields of industry, energy, healthcare and infrastructure solutions for cities. Since it was federally chartered in 1912, Siemens has stood for technical achievements, innovation, quality and reliability. Sales for Siemens in Canada in fiscal 2012 (ended September 30), were $2.1 billion CAD. The company has 53 offices and 14 manufacturing/assembly facilities across Canada.
