Quality Policy

Siemens, s.r.o.

Siemens is known for its world-class quality and stands for the highest standards. Our products and services are characterized by high innovation, precision, and reliability. Quality is a core value embedded in every phase of our value creation process.

Our quality management team plays a crucial role in anchoring and continuously improving this quality culture throughout the organization. Every employee is responsible for ensuring that Siemens projects, products, services, solutions, systems, software, and processes meet legal requirements, internal guidelines, and the expectations of our customers and partners. Together, we ensure that the Siemens brand is a guarantee of excellence today and tomorrow.

Our quality principles from the basis for this:

- Customer focus on all we do
- Personal commitment to quality
- Early check and testing to learn fast
- Real-time data and an open error culture
- Prevention, risk management, and systematic improvement process
- Lifelong learning and competent employees

By adhering to our quality policy, we are a trusted partner for our customers, delivering products, services, solutions, and systems of the highest quality.

We ensure the fulfillment of safety objectives in accordance with the Atomic Act No. 263/2016 Coll. and the decrees of the State Office for Nuclear Safety No. 408/2016 Coll. and No. 358/2016 Coll.

The management of Siemens, s.r.o undertakes to perform the quality policy as a part of its strategy.

Siemens Quality – we live Digital Transformation
