

CUSTOMER SERVICE FOR THE INDUSTRY

SiESTA

Siemens Extensible Security Testing Appliance

Siemens SiESTA is a unique security testing solution for OT/IT environments, combining market-leading and in-house tools on a single platform to a comprehensive security testing solution.

The user-friendly SiESTA-report gives you a quick and easy overview and status of the components, solutions, and/or entire network, and is an easy way to find the proper solution to mitigate the vulnerability. That saves valuable time and significantly increases security.

Scope of service

- Asset Discovery / OT Scan
- Infrastructure / Ports Scan
- Vulnerability and life cycle scan
- Malware scan
- Hardening / default credential scan

Preconditions

- Authorization to enter with equipment. To be clarified at order
- Confirm the network VLANs and TCP/IP blocks to be assessed
- Greenfield or brownfield. To be clarified at order
- Status of network to be provided before starting up

Price range covering from 1-100 IP addresses and 1-4 VLAN.
DKK 43,400 to DKK 76,200

Prices are valid until 30.09.2024

It is foreseen that the work is done within Siemens A/S normal working hours and that the site is located in Denmark.
