

GURU GOBIND SINGH FOUNDATION

Nasik

Guru Gobind Singh Foundation (GGSF) is a reputed educational organization in the North Maharashtra region running engineering and polytechnic colleges along with providing basic educational needs to the community.

Its Engineering college is accredited by Accreditation body NAAC of Govt Of India as B+.

The college has started cooperation in the area of imparting industry-grade training to their teachers and students by procuring SITRAIN kits way back in 2017. Currently the college runs Switchgear, Drives & Automation SITRAIN programs for students along with their regular curricula.

We, at Siemens Ltd are very proud of the fact that this college has tied up with us for adding value to their academic efforts. Siemens Ltd takes regular feedback from teachers, students and management team of college about the training and we are happy to report their complete satisfaction.

The college believes that the training by Siemens Trainers to teachers and to students greatly improves their employability as they get near-industry experience on SITRAIN kits.

Encouraged by this experience the college management has enhanced their portfolio and added Mechatronics training facility. This kit helps them run world renowned SMSCP program. The college is already running training program for students under Siemens CSR initiative.

The college has an added advantage of being located in Nashik, around which there are more that 10 technical institutes & colleges, which can benefit from these facilities. The college is in talks with industry customers and colleges to impart this high value training to them.

This not only brings much sought-after goodwill to college, but also gives it good return on their investment.
