Rapid Start with Best Practices

**XHQ Best Practices Packages** are pre-customized solution packages that can be integrated into existing XHQ solutions to address common business problems.

**You get:**
- Views, tools, and components that plug into any XHQ system
- High-value, best practice approaches based on decades of project experience
- Field-proven scalability for multiple business areas
- Ability to scale from small to even the biggest facilities
- Complete flexibility to tailor to your unique need

Currently there are six XHQ Best Practices Packages available:
- Batch Analysis
- Energy Management
- KPI Management
- Supply Chain Intelligence
- Quality Management
- Maintenance Management

---

**KPI Management with XHQ**

The KPI Management solution package helps continuously improve your processes.

It allows management – indeed, everyone, see how the business is performing in visual, actionable displays.

**Who benefits?**
Utilities managers, production managers, plant managers and any stakeholder.

**What is in it:**
- Intuitive web based user interface for creating and visualizing KPIs
- Calculation and visualization of KPIs: bar charts, time series, actual vs target, etc.

---

**The benefits you get:**
- Enables creation of high value visuals for presenting KPIs in a way that end users will find accessible and understandable
- Ensure high quality, accurate and consistent visuals that can be easily tailored to your corporate visual standards and style guides
- Works with data already available in XHQ
- The KPIs can be correlated with other data

® Siemens Digital Industries Software
KPI Management with XHQ Operations Intelligence Software

Use cases:
KPI Management

- Quickly put together relevant dashboards with KPIs important to a business unit
