

Patient comfort + satisfaction

Scenario

Comfort + control

When patients are admitted to a healthcare facility or hospital, they lose their ability to control their own environment, including temperature and light levels.

Significance

Patient outcomes

Comfortable rooms can contribute to better patient outcomes and enabling patients to control their space frees clinical staff from these tasks while minimizing fall risks

Partner

SONIFI Health

Interactive patient engagement solutions from SONIFI help make patient stays more comfortable, more effective and shorter in duration

Integration

SONIFI + Desigo CC

By integrating SONIFI with Desigo CC, healthcare organizations can empower patients to control their own room environments via the SONIFI app

Benefits

Enhanced comfort

Enabling the patient to control their room environment makes them feel at home and more comfortable to optimize their stay in your facility
