Siemens Worldwide

Siemens AG (Berlin and Munich) is a global technology powerhouse that has stood for engineering excellence, innovation, quality, reliability and internationality for 174 years. The company brings together the digital and physical worlds to benefit customers and society, focusing on intelligent infrastructure for buildings and decentralized energy systems, on automation and digitalization in the process and manufacturing industries, and on smart mobility solutions for rail and road transport. In fiscal 2020, the Siemens Group generated revenue of €57.1 billion and net income of €4.2 billion. As of September 30, 2020, the company had around 293,000 employees worldwide.

Innovation – that's how we shape the future

Innovations have always formed the basis for Siemens' success. In fiscal year 2020, the company filed about 2,740 patents and submitted around 5,120 invention disclosure reports. In total, Siemens holds 42,900 issued patents – an equivalent of 23 inventions every working day. The company employs around 40,700 R&D employees worldwide and reports an R&D expenditure of €4.6 billion in fiscal 2020. All of these figures include Siemens Healthineers and exclude Siemens Energy.

Transforming the Everyday

Siemens is a leading technology company centering on industry, infrastructure, and mobility. We are a different kind of tech company, transforming the everyday by building technology with purpose in this era of digital transformation. Our technology empowers our customers to transform the industries and infrastructure that form the backbone of our economies. Siemens' Core technologies for the digital future include: **Additive Manufacturing, Autonomous Robotics, Blockchain Applications, Connected (e)Mobility, Connectivity and Edge Devices, Cybersecurity, Data Analytics & Artificial Intelligence, Distributed Energy, Systems, Energy Storage, Future of Automation Materials, Power Electronics, Simulation and Digital Twin, as well as Software Systems and Processes.** Our ambition is to become the leading technology company for the industries that we serve – not just today, but in the future.

Sustainability

Serving society while doing successful and sustainable business is at the heart of Siemens' strategy. We are the first global industrial company to publicly commit to achieving carbon neutrality by 2030. By 2020, 70% of the electricity consumption of our sites globally is covered by renewables, and we have already reduced 54% of our CO_2 footprint. Beyond our own company, our customers saved 150 million tons of CO_2 in fiscal year 2020 with the help of innovative solutions from our Environmental Portfolio. In 2020, Siemens ranked number 2 among industrial conglomerates in the Dow Jones Sustainability World Index. In addition, the Carbon Disclosure Project rates Siemens as one of the world's most sustainable companies in the area of climate protection with an A-rating. We are also awarded by Fortune Magazine as the "Number 1 Most Admired Company" in our industry for the fifth consecutive year.

For more than 170 years we have been finding ways to improve life by developing technologies with purpose that transform the everyday. We're motivated by how we can make an impact, empower people and harness today's digital transformation for social good.
