## Technical Service Agreements for Electrical Systems

Services for power

[usa.siemens.com/services](http://usa.siemens.com/services)

**Forty percent of a typical maintenance budget is consumed by expenses related to reactive procedures.**

**Taking a proactive approach to the maintenance program for your power systems offers an effective means to reduce these costs.**

Avoid emergencies, minimize unnecessary expenses, ensure equipment reliability, and gain renewed control over your budgets with a comprehensive maintenance program from Siemens. Through a support agreement built on three levels of service (Silver, Gold, and Platinum), Siemens can deliver all of the required engineering services, labor, tools, and test equipment necessary to keep your electrical power system operating efficiently.

### How it works

After a thorough analysis of your operation, we will work with you to create a solution tailored to your business needs. It will specify

the time frame, scope, and costs for services to be delivered as well as provide special allowance for emergency services.

### From service provider to business partner

With a Siemens Technical Service Agreement, we will work with you and your team to define your process and business goals. Then we develop uniquely customized maintenance strategies to help you reach your objectives. These proactive strategies, complemented by modern monitoring technologies, will improve your equipment reliability, positively impacting your bottom line. Most importantly, the success of these changes will be realized by working closely with your employees to achieve sustained improvement.

**A Technical Service Agreement offers the following benefits:**

- Enhanced equipment reliability
- Improved safety
- Increased process efficiency
- Minimized risk of equipment failure
- Predictable monthly budgets
- Reduced maintenance costs.

**Select from the following services to design your customized program:**

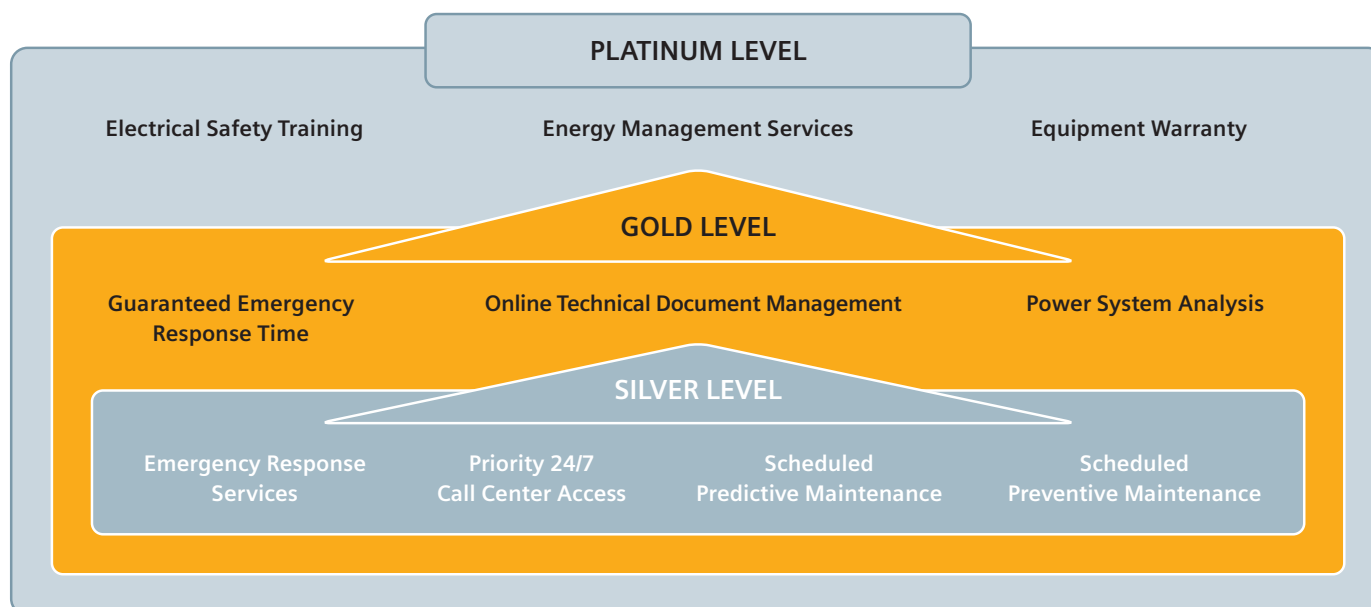

- Cost Reduction
- Electrical Safety Training
- Emergency Response
- Equipment Repair Services
- Equipment Warranty
- Power System Consulting
- Predictive Maintenance
- Preventive Maintenance
- Process Efficiency
- Safety Improvement
- Technical Documentation.

**Full Coverage Protection provides for equipment repair or replacement in the event of failure, even if you did not buy the equipment from us**

This comprehensive maintenance program from Siemens can significantly reduce your financial risk.

**Additional services which can be added to your Technical Services Agreement include:**

- Automation and Drives Integration Services
- Breaker Racking System Services
- Commissioning Services
- Equipment Repair Services
- Medium and Low Voltage Circuit Breaker Services
- SARRACSTM Safety Remote Services
- Transformer Services.
