Biography

Dave Hopping is global CEO of Smart Infrastructure Solutions & Services at Siemens Smart Infrastructure, a position he has held since October 2020. In this role, Hopping is responsible for the smart building and smart grid portfolios, including building IoT automation, digital services, fire safety, security, energy, low and medium-voltage, digital grid and control components.

Through the intelligent application of digital technologies and data analytics, the Solutions & Services business creates more sustainable, resilient and efficient building and energy infrastructure for people, cities and businesses.

Prior to his current role, Hopping was CEO of Regional Solutions and Services, Siemens Smart Infrastructure USA, and Vice President of Siemens Building Technologies' Building Performance and Sustainability business line and Head of the Building Automation business unit. He has held a variety of leadership positions across sales, operations and management.

Hopping is also a board member of the Siemens Foundation, having previously served as Chairman, and has served on the boards of Chicago's Museum of Science and Industry, Alliance to Save Energy and UI LABS' City Digital project.

He holds a Bachelor of Science degree in Electrical Engineering from Purdue University.
