

## Siemens Sitrans MAG6000 – Ethernet/IP Wireless Gateway

Siemens Ethernet IP (industrial Protocol) wireless gateway provides an easy to access and cost effective interface to industrial Communications Management Systems. The Ethernet IP (EIP) gateway easily interfaces with Siemens existing Modbus protocol modules. Ethernet IP communication supports implicit and explicit messaging with two-way, read/write communication.

The Siemens gateway enables users to access broad market of opportunities by meeting specifications for EIP connectivity and simplifying the access to the network with Wi-Fi or wired interface. The Siemens EIP wireless gateway dramatically improves start-up time and remote site support for field devices.

The EIP gateway has the unique ability to act as a Wi-Fi access point. Users can directly connect their mobile device to the gateway without having to be on the facility's LAN or WAN to access the local applications.

Each wireless gateway is delivered pre-configured for the customer's specific requirements. No additional programming or mapping is necessary.
