

Siemens ranked as a leader in security software for smart buildings

- **Independent analyst firm has recognized Siemens Smart Infrastructure as a leader in integrated smart building security software**
- **The software is part of the Siemens Xcelerator portfolio**

Industry analyst firm Verdantix has ranked Siemens Smart Infrastructure as one of the leading providers for security software in smart buildings. Their recently published “Green Quadrant: Integrated Smart Building Security Software 2023” report analyzes and evaluates ten companies that are shaping the market. Verdantix noted that Siemens solutions offer highly advanced unified security management capabilities. The assessed Siemens software is part of Siemens Xcelerator, an open digital platform that enables customers to accelerate their digital transformation.

“Being recognized by Verdantix as a leader in security software in smart buildings highlights our strategy of being the partner of choice for our customers on their digitalization journey and of strengthening our digital portfolio. It confirms the target we’ve set for ourselves: to make buildings safer and more resilient with software,” said Henning Sandfort, CEO of Building Products at Siemens Smart Infrastructure.

According to Verdantix, corporate real estate and facility managers seek more integrated solutions to provide trusted building and security operations, and to better protect the safety and wellbeing of their tenants. Digital advancements are paving the way for more flexible systems to provide both integrated and targeted operational views, automated workflows, deeper analytics, and broader value propositions.

For the evaluation, Verdantix analyzed Siemens’ comprehensive building security portfolio, including the on-premise offering Siveillance Suite with access control,

Siemens AG

Werner-von-Siemens-Straße 1
80333 Munich
Germany

video surveillance, intrusion detection and security management solutions, the cloud offering Building X Security Manager, as well as the Siveillance Add-ons that are hybrid solutions. Building X is a scalable digital building platform to digitalize, manage and optimize building operations, allowing for an enhanced user experience, increased performance and improved sustainability. Building X, which is built on the Siemens Xcelerator design principles, supports users in their digital journey to make intelligent decisions about their buildings.

Siemens Smart Infrastructure (SI) is shaping the market for intelligent, adaptive infrastructure for today and the future. It addresses the pressing challenges of urbanization and climate change by connecting energy systems, buildings and industries. SI provides customers with a comprehensive end-to-end portfolio from a single source – with products, systems, solutions and services from the point of power generation all the way to consumption. With an increasingly digitalized ecosystem, it helps customers thrive and communities progress while contributing toward protecting the planet. Siemens Smart Infrastructure has its global headquarters in Zug, Switzerland. As of September 30, 2022, the business had around 72,700 employees worldwide.

Siemens AG (Berlin and Munich) is a technology company focused on industry, infrastructure, transport, and healthcare. From more resource-efficient factories, resilient supply chains, and smarter buildings and grids, to cleaner and more comfortable transportation as well as advanced healthcare, the company creates technology with purpose adding real value for customers. By combining the real and the digital worlds, Siemens empowers its customers to transform their industries and markets, helping them to transform the everyday for billions of people. Siemens also owns a majority stake in the publicly listed company Siemens Healthineers, a globally leading medical technology provider shaping the future of healthcare. In addition, Siemens holds a minority stake in Siemens Energy, a global leader in the transmission and generation of electrical power. In fiscal 2022, which ended on September 30, 2022, the Siemens Group generated revenue of €72.0 billion and net income of €4.4 billion. As of September 30, 2022, the company had around 311,000 employees worldwide. Further information is available on the Internet at www.siemens.com.
