SIMATIC WinCC V7
The scalable and open SCADA system for maximum plant transparency and productivity

SIMATIC SCADA systems
The suitable SCADA system for every application

The course for tomorrow’s industrial world is already set today. With SIMATIC WinCC V7, you can rely on a future-proof system. Find out how SIMATIC WinCC V7 optimally prepares you for the requirements of tomorrow already today.

Requirements of the future
The data volume of modern industrial plants is continuously growing, entailing increasing requirements placed upon the employed SCADA solutions. Vast data volumes have to be managed and archived in the long term. At the same time, requirements in terms of performance are on the increase. Technologies, also from the consumer environment, are finding their way into industrial applications. Globalization calls for superior SCADA systems which are used worldwide. In addition, there is an increasing request for mobile access to plant information. Against the background of constantly increasing (energy) costs, all these requirements are topped off by the necessity for improved energy efficiency and productivity.

Fit for tomorrow, today
With SIMATIC WinCC V7, the scalable and open SCADA system from Siemens, you opt for the right choice throughout your plant’s entire lifecycle.

SIMATIC SCADA systems and IPCs
SIMATIC SCADA systems and SIMATIC Industrial PCs form together a powerful and reliable platform for the acquisition, analysis, and visualization of data. The coordinated and certified complete package consisting of both hardware and software offers the highest quality level for all industries.
Increase your productivity with SIMATIC WinCC V7

Engineering and operations control efficiency
Efficient engineering, integrated diagnostics functions, and flexible production analysis ensure reduced time-to-market as well as minimized plant downtimes.

SIMATIC WinCC V7 offers a reliable decision basis for optimizations and thus supports increased productivity coupled with reduced costs.

Innovative solutions
Thanks to innovative technology, all important information is consistently available - rapidly, flexibly, and safely.
SIMATIC WinCC V7 thus eases your production’s intuitive operation and monitoring - also remotely.

Easy scalability
SIMATIC WinCC V7 facilitates your plant’s easy functional or sector-specific expansion or modernization. Benefit from redundancy concepts for increased availability or opt for central plant information archiving and analysis.

Openness
Siemens relies on manufacturer-independent communication for the integration of existing hardware, as well as for an easy integration in the IT world. Another advantage: specific expansions for individual solutions according to your requirements.

Solution Partners & support
WinCC Specialists are at your service as qualified solution providers worldwide. These certified and centrally audited partners realize your individual SCADA project, also with distributed client-server architectures involving redundancy, or with applications involving energy data management systems.
Moreover, Siemens offers global support, according to the highest quality standards.
In addition to the 24/7 hotline, you can also consult experts in forums, and access freely available demo projects.
Easy scalability and efficient production analysis

Many user groups – with benefits for all

Automation and IT solutions are generally subject to permanent change. Among other, this comprises modernizations of individual plant areas, subsequent plant expansions, implementation of central site-spanning monitoring solutions, and optimization of site- or company-specific process workflows.

In order to meet such increasing requirements, the visualization solution has to be expandable as required without the risk of technology gaps, or the need for completely new configurations.
Investment protection is paramount. SIMATIC WinCC V7 offers the requested integrated scalability from the single-user system down to the distributed client-server solution with central long-term archive server and web-based solutions.
SIMATIC WinCC V7 options

Software expansions for individual requirements

Individual functional or sector-specific software expansions are available in the form of WinCC options* as well as WinCC add-ons.

WinCC V7 options

**Easy scalability**
- WinCC/Server – for distributed client-server systems
- WinCC/Redundancy – for increased availability
- SIMATIC Process Historian – powerful, plant-wide long-term archive
- WinCC/WebNavigator – plant operation and monitoring via the Internet/Intranet
- WinCC/WebUX – mobile access to important plant information
- WinCC/Telecontrol – integration of distributed remote stations in the telecontrol system

Operations control efficiency
- WinCC/UserArchive – management of user data records
- WinCC/Audit and WinCC/ChangeControl – tracking of operator actions
- SIMATIC Information Server – web-based reports of historical plant data on the basis of Microsoft Reporting Services or with Microsoft Excel
- WinCC/PerformanceMonitor – production analysis on the basis of individual key performance indicators and web-based performance reports in combination with the SIMATIC Information Server
- SIMATIC Energy Manager PRO – optimized energy operations control
- WinCC/CalendarScheduler – planning of events as calendar function
- WinCC/EventNotifier – forwarding of information as an e-mail or a text message
- WinCC/SES – sequencer for recipe and sequence-based processes

Openness for special requests
- WinCC/IndustrialDataBridge – bidirectional data exchange via standard interfaces - without programming
- WinCC/ODK, WinCC/ConnectivityPack und WinCC/ConnectivityStation – open interfaces for user-specific expansions

* Please observe the individual options’ release
Efficiency
As key to increased productivity, SIMATIC WinCC V7 combines efficient engineering with powerful archiving and maximum data security. It serves as the basis for efficient operations control and intelligent production analysis.

Scalability
We offer stationary or mobile solutions for increasing requirements – with guaranteed safety. For this purpose, we use our SCADA know-how of more than 15 years across all sectors. No matter how moderate or expansive your requests – we provide the suitable solution.

Innovation
Benefit from information provision anytime and anywhere with mobile SCADA solutions – also with available tablet or smartphone hardware. The application of multitouch gestures in industrial environments opens the door to modern operating concepts.

Openness
Thanks to the support of international standards as well as native script and programming interfaces, special requests can also be easily realized.

Universal applicability – solutions for all sectors and technologies
SIMATIC WinCC V7 is technology and industry neutral and features a modular and easily expandable design. It is employed worldwide, both in single-user applications in the field of mechanical engineering, as well as in complex multi-user solutions with redundant servers or web-based client access. References from numerous industries prove the solution’s versatility and high performance:

- Automotive production and suppliers
- Chemical and pharmaceutical industry
- Food, beverage, and tobacco industry
- Machine and plant engineering
- Energy supply and distribution
- Trade and service sector
- Plastic and rubber industry
- Metal processing and steel industry
- Paper production and processing
- Printing industry, transport, traffic, and logistics
- Water treatment and wastewater purification
- Building services management and management of properties
