

SIPROTEC & SICAM

# Function Point Manager

## Cloud-based generation of license files

The SIPROTEC & SICAM Function Point Manager is a cloud-based service for SIPROTEC and SICAM customers for the central administration of Function Points and to generate license files. With the Function Point Manager SIPROTEC 5, SIPROTEC 5 Compact and SICAM device functionality can be easily extended within seconds.

### Advantages in your daily work with the SIPROTEC & SICAM Function Point Manager

- One service for all your SIPROTEC 5, SIPROTEC 5 Compact and SICAM devices
- Switch between different SIPROTEC and SICAM budget accounts via one user account
- Order now, pay later: The Function Points are only invoiced when the license file is generated
- Activate device functionality quickly and easily through ad hoc generated license files
- Specify features late in the engineering process after device purchase
- Order and store SIPROTEC universal protection relays as spare parts independent of functions
- Use the Function Point Manager to organize and share all generated SIPROTEC and SICAM license files in your organization
- Share your budget account with colleagues
- Create multiple project-related budget accounts

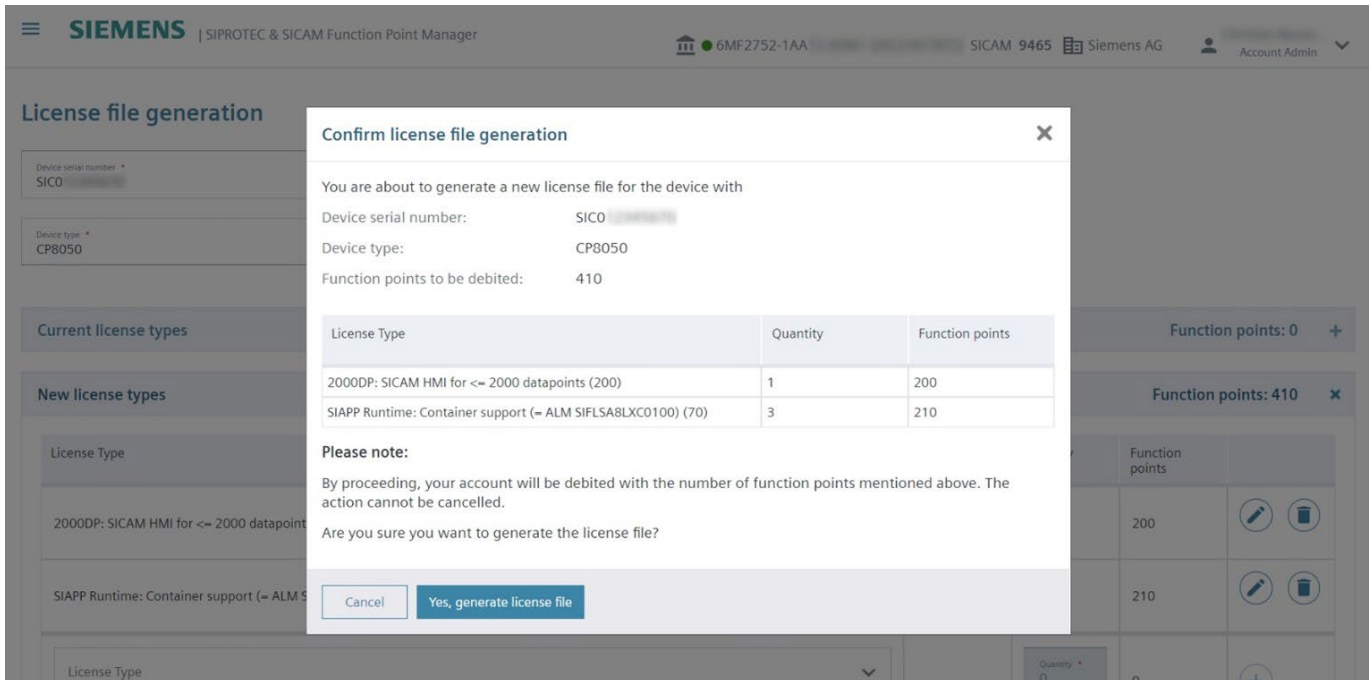

### Create budget accounts and acquire function points

- Register on [siprotec-function-point-manager.siemens.com](https://siprotec-function-point-manager.siemens.com) or [sicam-function-point-manager.siemens.com](https://sicam-function-point-manager.siemens.com)
- Create your SIPROTEC or SICAM budget account
- Receive your budget account-specific article number after account verification for ordering the SIPROTEC or SICAM Function Point budget
- Order the Function Point budget from Siemens Regional Sales or in the Siemens SiePortal
- Function Points are automatically credited to your budget account

### Generate License Files

Based on the available Function Points in the budget account, it is possible to generate license files for SIPROTEC 5, SIPROTEC 5 Compact and SICAM devices in seconds by entering the device serial number. The generated license file can be downloaded directly. The SIPROTEC license files are loaded onto the device using DIGSI 5 or SIPROTEC Tools. Use SICAM WEB to install SICAM license files.

Due to the temporal separation of the order of function points and the possibility to generate license files ad hoc, you gain a time advantage and maximum flexibility in engineering.

### Functional Enhancements with License files

SIPROTEC 5 license files contain the number of Function Points for a specific SIPROTEC 5 device. The number of Function Points into the device, define the scope of the functionality. An increase of Function Points means an expansion of the available device functionality.

SICAM license files, extension SICLIC, contain one or more license types that represent different device functions. Depending on the type, device-dependent license types can be instantiated single or multiple times.

### License Management

The generated license files are archived in the Function Point Manager and can be downloaded at any time. Manage all generated SIPROTEC 5 and SICAM license files of your organization.

### Account Transactions and -Management

Keep track of your budget accounts, their users, account balances and all Function Point debits and credits.

#### New: Function Point Manager V2.00 (11/2022)

- Create SICAM budget accounts and order SICAM Function Point budgets
- Generate SICAM license files
- The budget account number is also the account-specific article number for simplified ordering of the Function Point budget
- Subscribe to E-Mail notifications and receive information about account activities and general announcements about new Function Point Manager releases, etc.

Register today and benefit from maximum flexibility in creating functional extensions for your SIPROTEC 5, SIPROTEC 5-Compact or SICAM device. Click „Sign Up“ on [siprotec-function-point-manager.siemens.com](https://siprotec-function-point-manager.siemens.com) or [sicam-function-point-manager.siemens.com](https://sicam-function-point-manager.siemens.com)
