

Siemens W.L.L.

Siemens Business Portfolio in Qatar

Our Businesses in Qatar

1) Digital Industries

2) Smart Infrastructure

3) Large Drives Applications

4) Mobility

1) Digital Industries

Advances being made in digitalization – combined with the move toward increasingly flexible manufacturing processes – are creating new opportunities and choices for industrial companies across the globe.

Digital Industries helps its customers unlock their full potential: as a partner providing cutting-edge technologies for the automation and digitalization of the discrete and process industries.

The Digital Enterprise portfolio is at the core of our offerings. It provides companies of all sizes with the right products, along with consistent solutions and services for integrating and digitalizing the entire value chain. As an innovation leader, we think ahead to the next level of the digital transformation and of integrated cutting-edge technologies – such as artificial intelligence, edge computing, industrial 5G, autonomous handling systems, blockchain and additive manufacturing.

2) Smart Infrastructure

Smart grids + smart buildings = smart infrastructure.

Smart Infrastructure intelligently connects energy systems, buildings and industries to enhance the way we live and work through greater efficiency and sustainability. By integrating software and hardware, products, systems, and solutions, we make infrastructure more intelligent, responsive and responsible. Smart Infrastructure unites building technology with energy supply – including low- and medium-voltage power distribution and grid control. There are exciting growth markets at the grid edge, where these realms meet. In these markets, we ensure that energy is used efficiently – in generation, consumption and storage, in electric vehicle infrastructure and in microgrids. Our offerings combine physical solutions and digitalization across the focus areas of electrification and automation.

2) Smart Infrastructure – Business Portfolio

Electrical Products

Venkata Kiran Pilli
venkatakirani.pilli@siemens.com
+974 3334 1689

Products Summary

- Air Circuit Breakers ACB
- Molded Case Circuit Breakers MCCB
- Miniature Circuit Breaker MCB
- Residual Current Protective Devices RCCB & RCBO
- Motor Circuit Breakers
- Final Distribution Board
- Sub-Main Board
- Overvoltage Protective Devices
- Switch Disconnectors
- Switching devices
- Contractors
- Overload Relays
- Time Delay Relays and Special Relays
- Signaling and switches
- Soft Starters
- Capacitor Bank product & Controllers

Solutions Summary

- Low Voltage Switch Boards SIVACON
- Motor Control Centers
- Feeder Pillars
- Capacitor Bank Panels

Building Products

Mohammed Sheik Ali
mohammed.sheik@siemens.com
+974 30781636

Abdulhalim Kolko
abdulhalim.kolko@siemens.com
+9747033 5262

Products Summary

- Desigo CC
- Climatix IC
Building Management System
Desigo Primary Controllers
Desigo Total Room Automation
Desigo Control Point (HMI)
Climatix
- Synco
Symaro Sensors
HVAC Sensors
Acvatix : Valves and Actuators (PICV)
VAV controllers and Damper
Actuators
- Thermostats
GAMMA Range:
KNX Lighting Control System
Guest Room Management
- Home Automation
- Cerberus DMS
Fire Alarm System:
Cerberus Pro EN FAS
- Cerberus Pro UL FAS
Fire Suppression System:
Sinorix - HFC 227
Sinorix - Novec 1230
Sinorix - Inert Gas
- VESDA system (ASD)
Public Address System
- Cerberus PACE

Services Summary

- Through our Solution, Approved, Distributor or OEM partners

3) Large Drive Applications

Siemens Large Drives Applications (LDA) engineers and produces heavy-duty electrical drive systems for medium and high voltage ranges: electrical motors, converters and generators. Additionally we offer special large drives for ships, mines and rolling mills. Our digitalization expertise and outstanding service keeps the performance and availability of your drives always at the maximum.

Large Drives Application – Business Portfolio
