

TOTALLY INTEGRATED POWER

What's new

SIMARIS project 6.4

System-compatibility

- SIMARIS project 6.4 allows to load projects of version 6.x

Newly integrated products and systems

- ALPHA 3200 Eco power distribution board inclusive 3WL10 circuit-breaker
- AC charging unit VersiCharge
- DC-charging units SiCharge D and SiCharge UC
- G115D Decentralized frequency converter

Data adaptations of products and systems

Product portfolio update, mounting options for new devices as well als adaptation of editing functions for:

- BD01 busbar trunking system

Interfaces

- Interface to SIMARIS design (transfer file from SIMARIS design) expanded by new devices incl. Automatic assignment to matching systems and automatic configuration
- Project data transfer from SIMARIS design 10.2 to SIMARIS project 6.4 is possible by way of the transfer file, project data transfer from previous versions (SIMARIS design 10.1 and earlier) is not possible with SIMARIS project 6.4
- Project data transfer from SIMARIS busbarplan 2.0 to SIMARIS project 6.4 is possible by way of the transfer file, furthermore, now it is possible to transfer BD01 and LR busbar trunking systems

Documentation update

- Export of 3D-data for BIM (Building Information Modeling) in IFC 4.0-format for further systems
 - > Download plug-in for import into Autodesk Revit at www.siemens.com/simarisproject/bim
- Tender specification text updates regarding products and systems (GAEB xml, rtf)
