Buenos Aires
Harnessing digitalization to reduce waste and promote inclusion. The first Latin American city to upgrade to 100% LED street lighting.

The Atlas of Digitalization demonstrates how smart cities across the world are realizing their potential through digital technological innovation.

Like all cities, Buenos Aires faces unique challenges that require distinct solutions, and our Digitalization Readiness and Potential scores compare how prepared each is for a connected future, and what opportunities they have to transform beyond where they are today.

Each score pools data from a range of sources, rating developments around Sustainability, Mobility and Opportunity, the key themes from Expo 2020 Dubai.

**Sustainability**
How and what energy is used in buildings, travel and public spaces.

**Mobility**
Where, when and how people travel and connect and the impact it has.

**Opportunity**
How much people enjoy city living and how businesses thrive.

---

Sustainability

Drain sensors will help detect poor drainage and flooding risk.

Inter-American Development Bank also found increased use of smart water meters in combination with water-pressure regulation could cut water loss by 40% across five districts.

---

Domestic water consumption, liters per capita per day, Buenos Aires vs other cities, (latest available year)

Continued overleaf
Mobility

Automatic trains increase efficiencies for the new metro line.

Siemens are updating and expanding the railway network to electrify the Constitucion–La Plata branch of the Roca line. Plus a new metro line will include 16 new stations.

Opportunity

Access to Wi-Fi in 900 locations empowers digital inclusion.

Local services including miBA, an app to arrange a doctor’s appointment or pay for a parking ticket. Another app lets users upload photos of illegally parked vehicles - which cut complaints resolution by 93%.
