

Power Generation Services

Siemens Power Academy – K-T2-OPE
SPPA-T2000 Operator Course for Process Control/Information System

Brief Description

The client's personnel is able to practice all operations for process control, fault analysis and documentation on a simulated power plant process. Faults are incorporated into the process where the participants can repeatedly practice the correct response in case of emergency. The participants thus become familiar with operating the system and will quickly be able to handle their power plant control room equipment using the familiar symbols.

Target Group

The course is applicable for power plant operating personnel. The participants will learn the functions of an OM650 system and how to operate it for tasks associated with process management and information.

Prerequisites

Experience in controlling power plant processes.

Contents

Introduction to the SPPA-T2000 control system with OM 650
Presentation of system functions and operating features

Exercises using a simulated process on an installed OM system. Normal operation will be practiced, process

information must be called and analyzed. Exceptional situations will be generated using simulated errors and must be handled.

Online-logs and online-curves are handled.

Course Details

Size: Max 8 participants

Language: English or German

Duration of course: 2 days

Location of course: Siemens Training Offices / Customer site

Dates: Upon consultation

Course can be adapted to match the client's shift routine.
