

A photograph of an aquaculture farm in a body of water. In the foreground, there are several large, rectangular cages made of metal frames and green netting, floating on the water. To the left, a white service boat with a blue stripe is visible. The background shows a calm sea and distant, hilly land under a clear blue sky.

Aquaculture 4.0

Digitalization for the SME

Aquaculture 4.0

Overview of entire Fish Farm Eco System

Aquaculture 4.0

Challenges & Market information

Trusted Food Source

Consumers want to know the **origin of food source** and all relevant information during the harvesting process

Optimized Fish feed

Fish pellets is a main source of feed. A sustainable system that **matches the feeding cycles to optimal growth rate** will increase profits for farmers

Less Antibiotics

Excessive antibiotics and/or growth hormones administration is a major threat to world health as it can lead to increased **antimicrobial resistance**

Predictive Disease Control

Effective data driven disease control to limit the spread of **infectious diseases/pathogens**

Environmental Pollution

Wastewater discharge containing feces, nutrients and chemicals released into the ocean results in **algae bloom** which **removes dissolved oxygen**

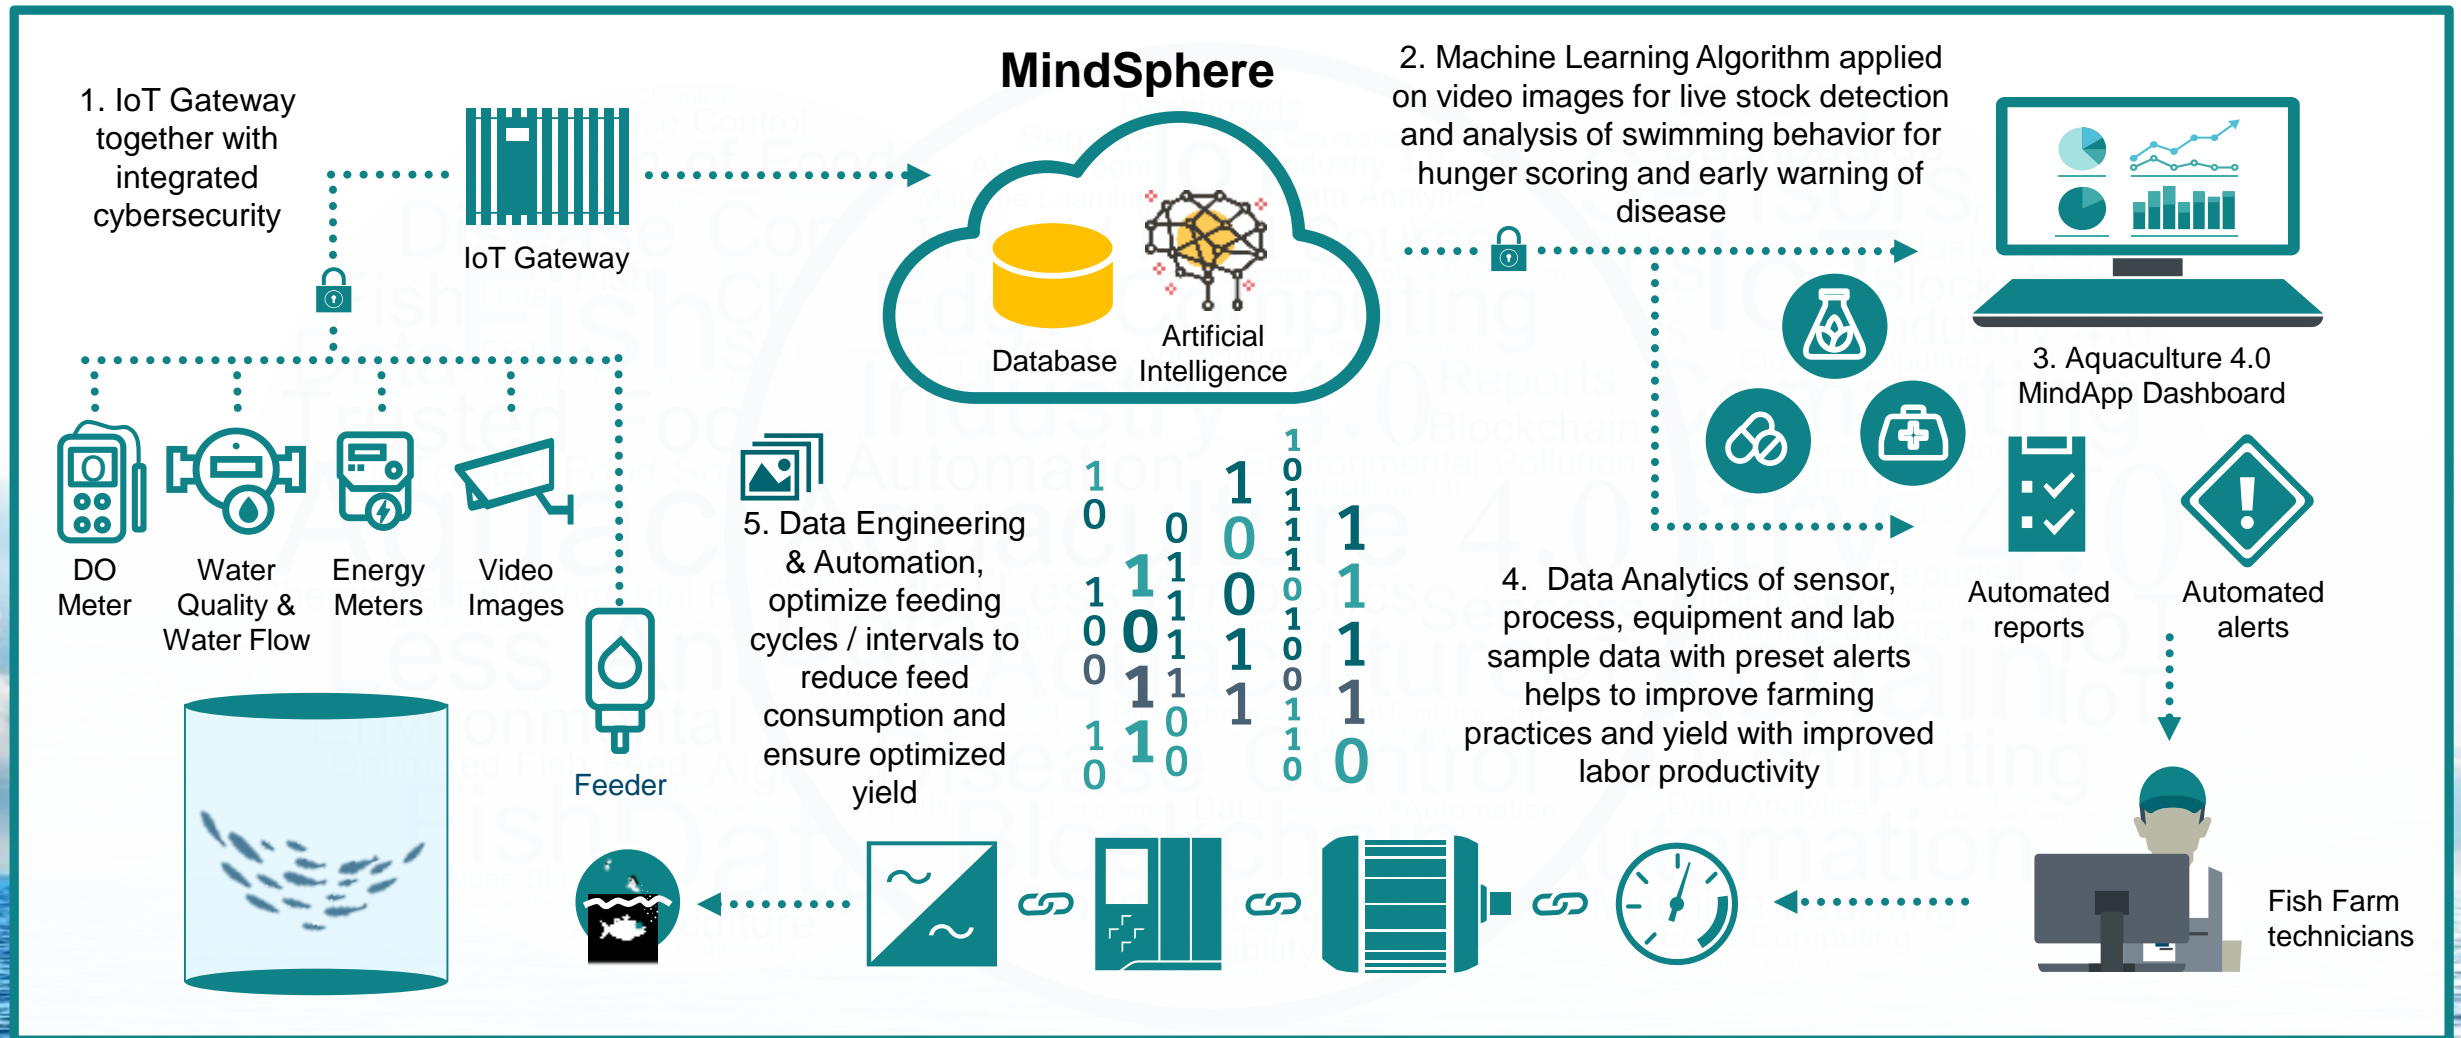

Top 10 Countries for Aquaculture Production

Rank	Country	Production MMT*
1	China	63.70
2	Indonesia	16.60
3	India	5.70
4	Vietnam	3.60
5	Bangladesh	2.20
6	Philippines	2.20
7	South Korea	1.90
8	Egypt	1.40
9	Norway	1.30
10	Japan	1.10

Leveraging Industry 4.0 to tackle the challenges of fish farming

SIEMENS
Ingenuity for life

MindApp User Interface: Plant Manager Dashboard

ALARMS

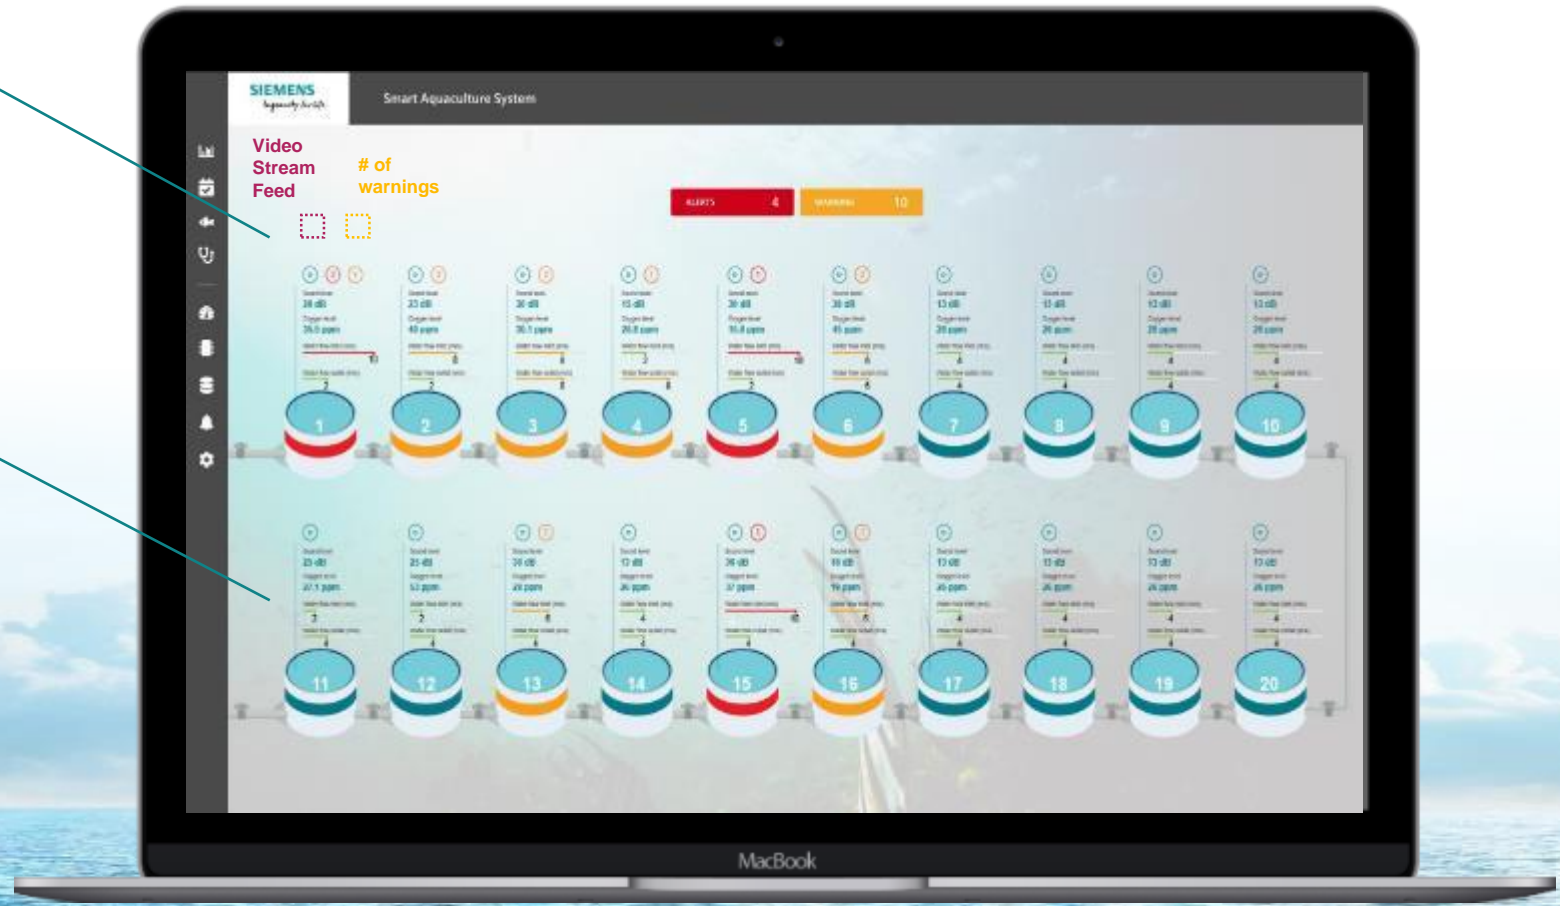

- Indicates the alarms and notifications based on preset threshold limits
- User are allowed to set the limits for various measured / input parameters

OVERVIEW

- Indicates the overall condition of individual tanks
- Flow rates (inlet/outlet), and relevant sensor data such as dissolved oxygen level will be reflected
- Color coding of each tanks for indication of statuses

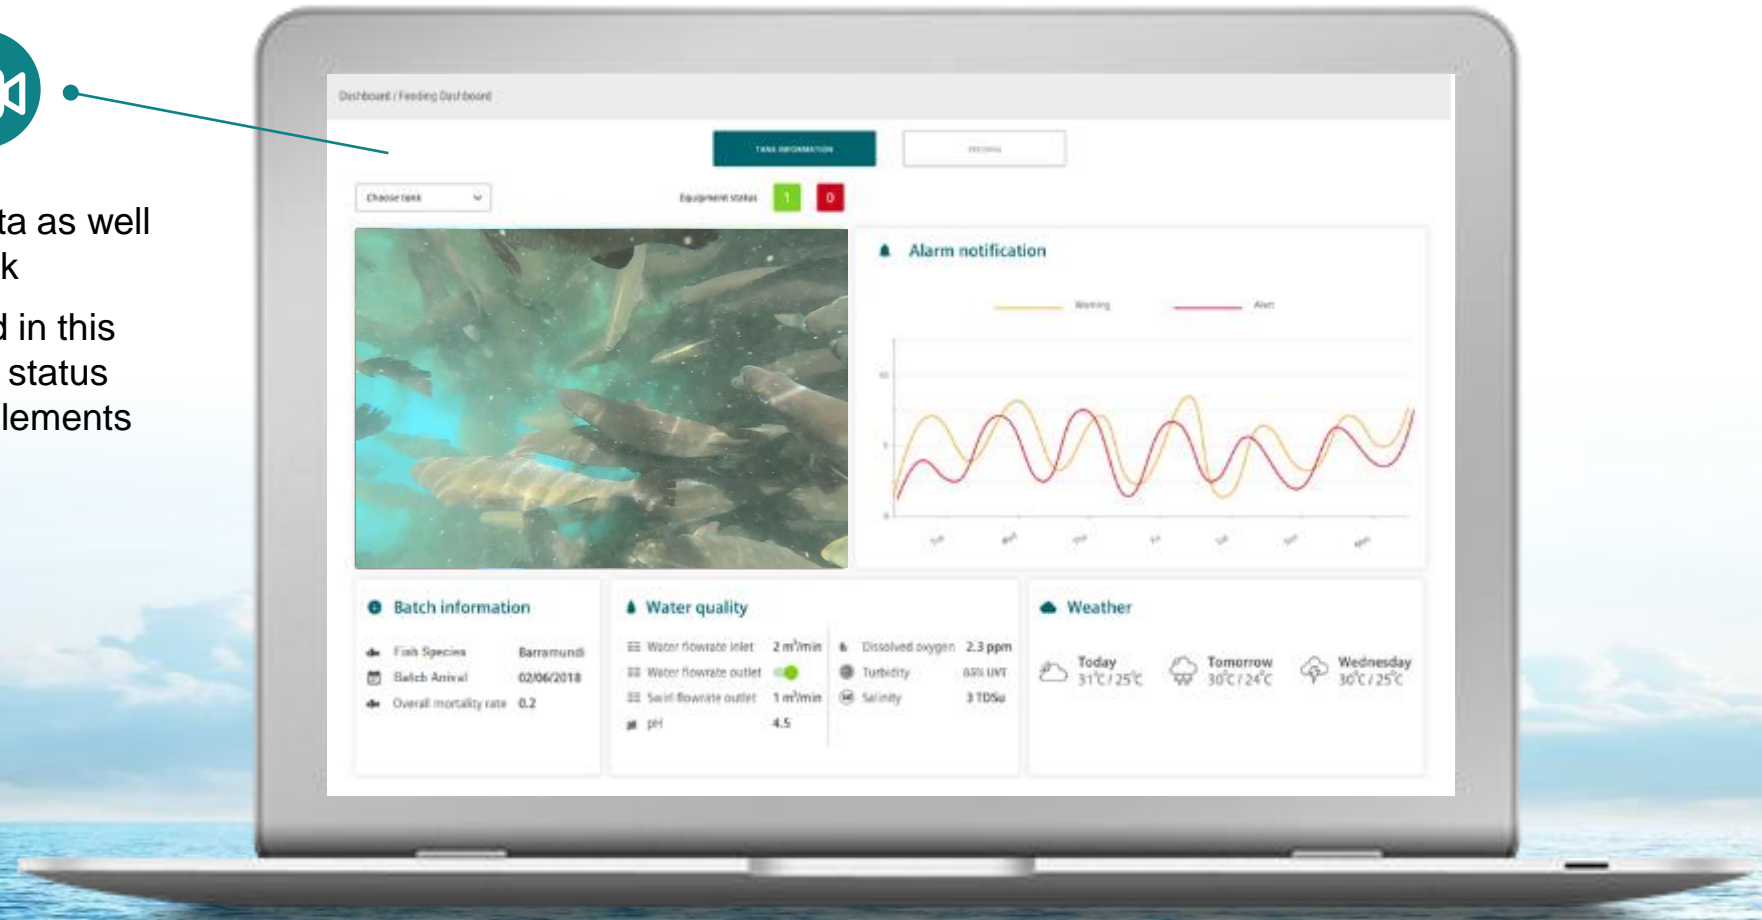

MindApp User Interface: Feed Dashboard

VIDEO FEED

- Reflects relevant batch related data as well as video feed streams of each tank
- Weather forecast is also displayed in this stream with the overall equipment status reflected in different color coded elements

Thank You !
