

SMART HEALTHCARE

Fire Services for DNV Healthcare Accreditation

Keep your healthcare facility in constant preparedness for Fire and Life Safety surveys.
usa.siemens.com/fire-healthcare-accreditation

It's important that you be ready, without being overwhelmed.

DNV Healthcare accreditation is a collaborative yet stringent accreditation philosophy in healthcare certification, and as a facility professional, the responsibility for Fire and Life Safety code compliance falls to you. This means that you're on the spot when surveyors, including a Physical Environment Specialist, arrive unannounced.

Yet with the overwhelming number of operating challenges you face on any given day, it's unlikely you have time to continually think about Fire and Life Safety documentation. So it's good to know that Siemens does. Siemens Fire Services for DNV National Integrated Accreditation for Healthcare Organizations (NIAHO®) are designed to give you peace of mind, knowing that a sudden visit is never a cause for alarm.

Leave the documentation management to us.

The DNV NIAHO® program requires that you maintain an extensive set of Fire and Life Safety documentation, properly completed, appropriately organized, and easily accessible. Missing paperwork or incomplete entries are more than embarrassing; they can trigger non-compliance, requiring corrective action.

The Siemens Fire Services for Healthcare Accreditation™ Program is designed to simplify and streamline the DNV Healthcare accreditation process and provide customized test reports for Fire and Life Safety inspections. Through our comprehensive documentation management process, we organize test reports and supporting documentation in a structured and easily accessible format.

SIEMENS

Siemens Fire Services for Healthcare Accreditation™ ensure proper documentation of all inspection and test reports related to Fire and Life Safety systems in your buildings, and are designed to simplify and streamline the audit process. The program provides you with an annual delivery schedule to ensure no test is overlooked. Regular review meetings can be included to familiarize your staff members with all related documentation and paperwork as well as prepare them to speak knowledgeably during a survey.

Our goal is to help you avoid unpleasant surprises, plus you'll be freed up to devote more of your limited resources to daily operations.

Our highly trained professionals speak the DNV language.

You can depend on Siemens testing, inspection, and documentation to mirror the very latest Physical Environment PE.2; SR.10 for Acute Care Hospital & PE.2; SR.8 for Critical Access Hospital requirements as it relates to Fire Detection, Notification, Protection, and Suppression Systems. The Siemens Fire and Life Safety service team maintains in-depth knowledge National Fire Protection Association (NFPA) Life Safety Code® standards as they relate to healthcare environments.

Siemens technicians are trained at the world's most advanced fire safety training laboratory in Buffalo Grove, Illinois — where they receive hands-on training and experience with systems from almost every major manufacturer. Our Siemens technicians are NICET-certified and supported by the collective knowledge and power of more than 100 nationwide Siemens branches.

Make Siemens your source for Fire and Life Safety.

When Siemens partners with your facility, you can end the hassle of managing multiple vendors. With one service agreement, you can consolidate testing and maintenance processes, scheduling, and documentation for all your Fire and Life Safety systems – whether from Siemens or another manufacturer.

Testing and maintenance services can include fire alarm systems, sprinklers, kitchen hoods, portable extinguishers, fire pumps, fire suppression systems, and more.

Highlights

- Testing of Fire and Life Safety systems to NIAHO® Physical Environment and other regulatory standards
- Easy-to-read, customized test report for each applicable NFPA reference
- Comprehensive inspection management and schedule, structured around the NIAHO® Life Safety Code (LSC) 101-2012 Checklist
- Collaborative approach to develop a corrective action plan to address any deficiencies and repairs.
- Account management services, including frequent review meetings
- Assistance with interpretation of NIAHO® standards and requirements
