SIEMENS

EASY BENEFITS

Freight transport gets smart.

The Smartron® brings intelligent simplicity to the rails: one design, one contract, one price. The range of features is tailored specifically to a single defined transport task: country-specific freight transport. The smart business model unites the benefits of a standard product with platform-tested technology. The result is an optimally tailored performance with attractive terms and conditions.

Easy
One variant, optimally tailored configuration

Reliable
Vectron-tested components

Fast
Easy ordering process, short delivery time

Focused
One product, perfectly matched to the requirements of domestic freight transport in selected countries

Economical
Attractive price

SIEMENS

Smartron

EASY MOBILITY

Fully proven – even before the first trip.

Stability – today and tomorrow

Proven quality for future viability:

The Smartron relies entirely on powerful, Vectron-tested components whose reliability has already been proven over hundreds of millions of operating kilometers. Regular model upgrades ensure that the Smartron will remain the state of the art into the future.

As a result, it ensures superior dependability and guarantees long-term reliability.

Smartron facts and figures

 Max. power at wheel: 5,600 kW

 Track gauge: 1,435 mm

 Length: 18,980 mm

 Wheel diameter, new / worn:
1,250 mm / 1,160 mm

 Weight: 83 t

 Maximum speed: 160 km/h

 Starting tractive effort: 320 kN

Optimal power and superior reliability: The Smartron is the ideal answer to the requirements of domestic freight transport.

EASY START

Buying a locomotive was **never this simple.**

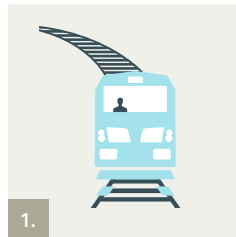

The Smartron is easy to drive

Convenient ordering

Incredibly straightforward and time-saving: The smart product strategy is based on just one variant, so it facilitates standardized, accelerated buying. Additionally, the Smartron will arrive quickly thanks to a short delivery time.

Easy operation

Familiar and ready for use from the very start: The Smartron driver's cab and console are based on the proven and well-established Vectron concept, maximizing dependability and making staff planning more flexible.

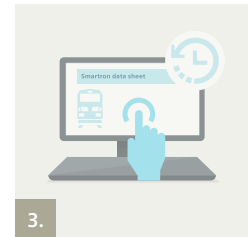

1.

Take a trial run with the Smartron to help make up your mind

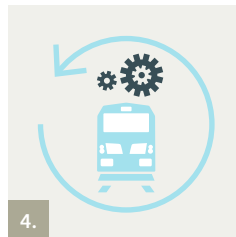

2.

Request the data sheet and standard offer

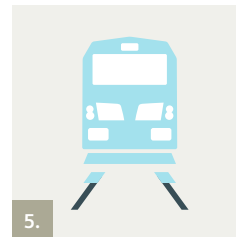

3.

Order Smartron

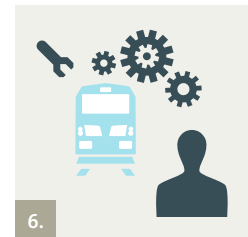

4.

Profit from rapid processing

5.

Benefit from a short delivery time

6.

Use tailored to your needs services

Your benefits at a glance

Time savings

Reduced costs and time

Excellent dependability

Easy maintenance and repair

Economical operation

A secure investment in the future

The right solution to meet your needs: Thanks to its uniquely attractive purchase price combined with maximum availability and robustness, the Smarttron is the ideal product for relieving the cost pressures in domestic freight transport in selected countries.

Economical alternative

Fast return on investment and minimal maintenance and repair costs: The Smarttron gives you a new economic perspective. Thanks to maximized cost efficiency in all areas, it's a real alternative to refurbishment.
