

ENVIRONMENTAL PROTECTION, HEALTH MANAGEMENT AND SAFETY

EHS Policy

As a globally active company, we have special responsibility for tackling global, long-term challenges, such as demographic change, climate change and diminishing resources. Sustainability is the key to securing our company's future. Our commitment to being a socially responsible company requires us to meet the demands of commerce in an ecologically and socially sound manner Siemens therefore gives high priority to achieving excellence in Environmental Protection, Health Management and Safety. Our forward-looking commitment strengthens the competitiveness of our customers and lays the foundation for our successful future.

Our innovative products, systems and solutions help to improve people's quality of life worldwide. In particular, they help to protect the climate through high energy efficiency, ensure the supply of clean water, safeguard and promote people's health and provide environmentally compatible transportation systems. With these aims in mind, we consider the entire product lifecycle. We design, develop, manufacture, market and refurbish our products and systems so as to protect the environment and human health in a manner that meets or exceeds any applicable regulations and in order to minimize the impact on our natural resources. We provide working conditions that safeguard performance, health, motivation, and satisfaction of our people.

Environmental Protection, Health Management and Safety contribute to the long-term protection of people's health and the company's assets. Our global EHS management system lays the foundation for the continuous improvement of our performance in these areas.

All people have a duty to act in accordance with this EHS Policy and meet the applicable requirements.
