

-  **Cost effective**
-  **AI Powered**
-  **Scalable**
-  **Easy to deploy**
-  **Searchable Meta Data**
-  **VMS Integration**

AerWatch® is a cutting-edge real-time situational awareness platform that uses advanced Artificial Intelligence to control large amounts of information from multiple sources within your operating environment. With **AerWatch®**, you can effectively monitor the safety and security of your school, ensuring that the right information is available to the right people when and where needed.

Ensuring safety and security on school campuses is a top priority for any educational institution. But as school environments become more complex, monitoring and managing them can become increasingly challenging and costly. That's where **AerWatch®** comes in.

AerWatch® provides unprecedented insight into the behaviour of people in different locations, such as the library, computer rooms, and playground, helping you track truancy, engagement levels, headcount, and space utilisation. **AerWatch®** also offers real-time alerts, allowing your school personnel to act immediately in case of any potential threats or unusual behaviour. With its powerful AI engine constantly learning and adapting to the environment, **AerWatch®** significantly reduces false alarms, enabling you to focus only on the events that matter. **AerWatch®** is easy to integrate with your existing CCTV.
