

# Is your cabinet up to date?

Check out our **tips and tricks** to improve your workflow.

You have existing processes, but demands are increasing and work is becoming more complex. Everything that is planned for in the control cabinet must be accommodated for in the smallest possible space. Staying up to date on the latest control panel changes takes a lot of time and work. Below are six examples of how you can work more efficiently by using the control components of the **SIRIUS Modular System** so that you can continue to meet the demands of the market.

**Space Saving**

Save up to

**30%**

more space using compact switching devices

**Efficient Engineering**

Seamlessly import configuration data and save up to

**80%**

of time with SIRIUS product data

**Quick Wiring**

Switching to spring-loaded technology saves **time and money**

**Tested Combinations**

Our pre-tested and pre-assembled switching devices save **time** and **effort** for **configuring, ordering** and **assembly**.

**Modular Build**

Ordering and storing becomes up to

**30%**

more **economical** with the SIRIUS Modular System

**Worldwide Use**

Time savings of up to

**25%**

using the **universally applicable** SIRIUS Modular System
