

## Daily digital programmable room thermostat

**BPS242**

### Features

---

- Daily digital programmable room thermostat
- Large, easy to read display
- Battery powered
- Volt free contacts (24-250V)
- Ideal for combination boilers
- Large control dial
- Advance and override functions

### Use

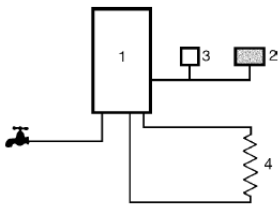

---

The BPS242 daily digital programmable room thermostat is designed to provide individual control of domestic central heating systems. In conjunction with the appropriate motorised valve(s) it can be used in most types of domestic heating installations to provide time/temperature control.

## Application Examples

---

### Combi Boiler

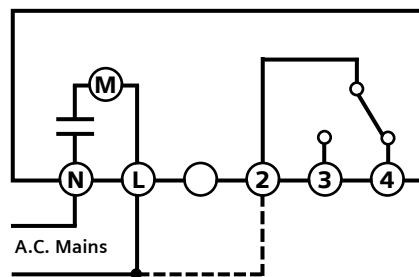

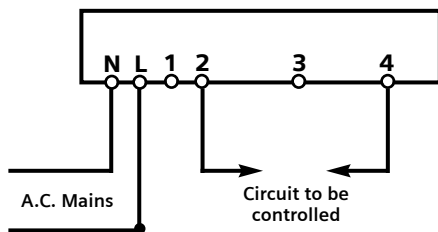

### Key

- 1 Combi Boiler
- 2 Timeswitch BUT2
- 3 Room thermostat BPS242
- 4 Heating circuit

## Wiring Diagrams

## Technical Data

---

Power supply	2x1.5V AA batteries
Temperature switching range	5°C to 30°C
Switching Voltage	24...250 V~
Current Rating	5(2)A
Housing ABS resistant to fire	as IEC 730 standard
Dimensions	90mm wide x 120mm high x 30mm deep
