

THE CORPUS CHRISTI AREA MEASUREMENT SOCIETY

Learn about the fundamentals of natural gas flow measurement using clamp-on ultrasonic flow meters

Join Martin Dingman of Siemens Industry, Inc., at the 2023 Corpus Christi Area Measurement Society, where he will discuss clamp-on ultrasonic technology for natural gas flow measurement. Topics to be covered are benefits, principles of operation, natural gas properties, field installations, custody transfer, and critical diagnostics.

Attendees will learn the many benefits of clamp-on ultrasonic flow meters and how to apply them to various natural gas applications. In addition, attendees will learn how gases behave and how to properly install, commission, and verify the accuracy of clamp-on gas flow meter field installations and custody transfer meter runs.

The presentation will conclude with a summary followed by a Q&A session. Please bring your clamp-on ultrasonic flow questions and problems.
