Siemens observes the principles of data protection, in particular the principle of data minimization (privacy by design). For this product ‘SIMATIC mobile IQ’ this means: The product does not process / store any personal data, only technical functional data of the instruments connected are being downloaded to the app (e.g. parameter, identification of the connected instrument like e.g. serial number, echo profiles, etc.). If the user than further processes this data on his device and/or links it with other data (e.g. shift plans) or stores personal data on the same medium (e.g. hard disk) and thus establishes a personal reference, the user must ensure compliance with data protection regulations.
